

**Consolidated Financial Statements and  
The Auditors' Report Thereon**

For the period ended 31 March 2016

## **INDEPENDENT AUDITORS' REPORT**

### **To The Shareholders of Abu Dhabi Islamic Bank - Egypt (S.A.E)**

#### **Report on the Consolidated Financial Statements**

We have audited the accompanying consolidated financial statements of Abu Dhabi Islamic Bank - Egypt (S.A.E), represented in the consolidated balance sheet as at 31 March 2016, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the three months then ended, and a summary of significant accounting policies and other explanatory notes.

#### **Management's Responsibility for the Consolidated Financial Statements**

These consolidated financial statements are the responsibility of Bank's management. Management is responsible for the preparation and fair presentation of these financial statements in accordance with the instructions of preparation and presentation of financial statements for Egyptian banks issued by Central Bank of Egypt on 16 December 2008 as well as with relevant Egyptian Laws and regulations. Management responsibility includes designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatements whether due to fraud or error. Management's responsibility also includes selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

#### **Auditors' Responsibility**

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Egyptian Standards on Auditing and applicable Egyptian laws. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance that the financial statements are free from material misstatements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the bank's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, and evaluating the overall presentation of the Consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

#### **Opinion**

In our opinion the consolidated financial statements referred to above, give a true and fair view, in all material respects, of the consolidated financial position of Abu Dhabi Islamic Bank - Egypt (S.A.E) as of 31 March 2016 and of its consolidated financial performance and its consolidated cash flows for the three months then ended in accordance with the instructions of the preparation and presentation of financial statements for Egyptian banks issued by Central Bank of Egypt on 16 December 2008 as well as with relevant Egyptian laws and regulations.

## Emphasis of a Matter

Without qualifying our report, we draw your attention to:

- 1- Note no. (2-b) to the consolidated financial statements, the Bank's accumulated losses as of 31 March 2016 have reached LE 2,853 million (31 December 2015: L.E 2,963 million) which exceeds half the issued and paid up capital. In accordance to article no. 69 of the Companies' law no. 159 of 1981, Shareholders' Extraordinary General Assembly Meeting should be convened to decide the continuity of the Bank's operations. The Extraordinary General Assembly Meeting held in 18 October 2015 has decided the continuity of the Bank's operations.
- 2- Note no. (38) to the consolidated financial statements, the Bank's management filed a law suit during February 2012 regarding the unconstitutional nature of the tax on interest on treasury bills and treasury bonds on the basis that the Bank has not recognized taxable profits for the disputed years. According to the Bank's legal and tax advisors' opinion, it is probable that the Bank will win the case.
- 3- Note no. (30) to the consolidated financial statements, the Bank's management formed a provision of L.E 234 Million for the potential claims based on the Bank's external legal advisor opinion to cover the potential claims from Abu Dhabi Islamic Bank- UAE.

## Notes to Consolidated Financial Statements as of 31 March 2016

### 1- General information

Abu Dhabi Islamic Bank – Egypt (formerly National Bank for Development - SAE) was established in 1974 in accordance with Investment Law No. 43 of 1974 and its executive regulations and the amendments thereon and is listed on the Egyptian Stock Exchange (EGX).

Abu Dhabi Islamic Bank - Egypt is subject as a financial institution to the supervision and control of the Central Bank of Egypt (CBE). In addition, as a Shari'a compliant bank it complies with Shari'a principles in all transactions and products provided to its clients, whether such products are investment deposits, Islamic investment Sukuk or savings accounts as well as meeting client's various financing needs by providing options such as Murabaha (Cost-plus), Musharka (Joint Venture), Ijarah (Leasing) and cash back cards. It also offers Islamic options for letter of guarantee and letter of credit. The Bank has a Shari'a Board composed of Islamic jurists who are continually consulted regarding all aspects of new existing and banking transactions.

Based on General Assembly resolution EGM held on September 3, 2007 has approved the amendment of the National Bank for Development was renamed to Abu Dhabi Islamic Bank - Egypt after completing a conversion of the Bank's activities in accordance with the provisions and principles of Islamic law.

The bank provides a full range of banking services to corporate, retail and micro finance clients in Egypt and the head office is located in Cairo, 9 Rostom st, Garden City. Through 70 branches across all governorates and are served by 2,270 employees at 31 March 2016

The Consolidated financial statements for the period ended 31 March 2016 have been approved by the bank's board of directors on 4 May 2016.

### 2- Summary of significant accounting policies

Below are the significant of accounting policies applicable for the preparation of the consolidated financial statements;

#### A) Basis of preparation of the consolidated financial statement

These consolidated financial statements have been prepared in accordance with the Central Bank of Egypt (CBE) basis of preparation of the bank's consolidated financial statements and principles of recognition and measurement as approved by its board of directors on December 16<sup>th</sup>, 2008. These consolidated financial statements have been prepared under the historical cost convention, as modified by the revaluation of trading financial investment, Available for sale financial assets.

There consolidated financial statements have been prepared in accordance with the requirements of related applicable Egyptian laws and regulations. The bank has also prepared consolidated financial statements for the bank and its subsidiaries in accordance with the central bank of Egypt (CBE) basis of preparation, which are companies in which the bank owns directly or indirectly more than half of the voting rights, or has the ability to control the financial and operational policies regardless of the type of activity.

#### B) Going concern principle

The accumulated losses were LE 2,853mn as of 31 March 2016 (31 December 2015: LE 2,963mn), which exceeds half of the paid up and issued capital which requires the calling of Extraordinary General Assembly meeting to discuss the bank's continuity as per article no. 69 of company's law no. 159 for year 1981. An Extraordinary General Assembly meeting held on 18th October 2015 which approved the bank's continuity as a going concern.

## Notes to Consolidated Financial Statements as of 31 March 2016– Continued.

### C) Basis of consolidation

#### C/1 Subsidiaries

Subsidiaries are entities (including special purpose entities) which the group has the power to govern its financial and operating policies. Usually the group's ownership exceeds half the voting power taking into consideration potential future voting power that the group has the option to exercise or convert at the time of control assessment. Subsidiaries are fully consolidated from the date the group assumed control; it is disposed at the date the group loses control.

Group acquisition of entities is accounted for using purchase method. The cost of acquisition is measured at the fair value, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued and any costs directly attributable to the acquisition process.

Identifiable acquired assets, liabilities and assumed contingent liabilities are recognized at fair value at the date of acquisition.

Excess of acquisition cost over the fair value of the group's share in net identifiable acquired assets is recognized as goodwill. If the acquisition cost is less than the fair value of net identifiable acquired assets, the difference is recognized in the income statement.

Subsidiaries which have been consolidated in the bank's financial statements are as follows:

Company	Ownership %	Industry
National company for Glass	86.13%	Manufacturing
National company for trading and development (ENTAD)	65.74%	Commercial
Assuit Islamic company for trading and development	55.13%	Commercial
Cairo national company for investment	75.73%	Financial Investment
ADI Lease for Financial Lease	95.91%	Financial Lease
Abu Dhabi Islamic holding company	99.92%	Holding
Abu Dhabi Islamic Capital	99.52%	Financial Investment
Abu Dhabi Islamic Properties	97.88%	Real estate
ADIB Invest	98.98%	Financial Investment
Alexandria National Company for Financial Investments	69.12%	Financial Investment
Cairo National Company for Brokerage & Securities	51.25%	Financial Investment

Transactions, balances and unrealized gains resulting from transactions between the group entities are eliminated in the consolidated financial statements unless they indicate impairment in the value of transferred assets. Accounting policies of subsidiaries are changed when necessary to comply with the group's accounting policies.

## Notes to Consolidated Financial Statements as of 31 March 2016– Continued.

### C/2 Transactions with Non-controlling interests

The group considers transactions with non-controlling interests as transactions with external parties. Gains and losses due to sale to non-controlling interests are recognized in the income statement. Purchase from non-controlling interests results in goodwill which represents the difference between consideration given and book value of subsidiary's net assets.

### C/3 Associates

Associates are entities over which the bank influences the financial and operating policies of the company whilst not reaching control, usually the bank's ownership represents 20% to 50% of the voting power. Investment in associates is initially measured at cost and is accounted for subsequently using equity method. Investment in associates includes goodwill (less impairment loss) which was recognized at acquisition.

The group's share in associates' profit or loss post acquisition is recognized in the income statement while the group's share in changes in associates' equity pre acquisition is recognized in the group's equity. The book value of investment in associates is adjusted with the post-acquisition accumulated changes. If the group's share of the associates' loss exceeds its book value the group does not recognize further losses. Transactions, balances and unrealized gains resulting from transactions between the group entities are eliminated in the consolidated financial statements unless they indicate impairment in the value of transferred assets. Gains and losses that result from changes in ownership structure of associates are recognized in income statement.

### C/4 Inventory

Inventory is measured at the lower of cost or net realizable value, Inventory costs include all costs incurred in bringing the inventory to its present location and condition as follows:

- Raw materials, spare parts, packing tools and fuel.
- Purchase costs using moving average method.
- Finished and Semi-finished products.
- Manufacturing costs, direct-labor costs and indirect costs based on normal activity rates.

Net realizable value is the estimated selling price less the estimated costs of completion and the estimated costs necessary to make the sale. Provision for obsolete and slow moving items is formed when necessary.

### C/5 Real Estate Investment

Gains or losses arising from changes in the fair value of real estate investments are recognized in the profits and losses of the year when they were realized.

The fair value of real estate investments is the exchange value of a particular asset between parties each of them has a desire to exchange and aware of the standing facts, dealing with free willing and this estimate of the fair value, in particular, does not include the estimated price inflation or deflation with special conditions or certain conditions such as unusual funding or the special arrangements of sale, Re-lease, The particular amounts or concessions granted by any party related to the sale.

The property determines the fair value without making any deduction for the transaction costs that may be incurred by the facility in the process of selling or the other exclusion.

## **C/6 Projects under construction**

Costs incurred in construction or to acquire fixed assets are recognized as projects under construction till it becomes ready for use after that these assets are transferred to fixed assets when it becomes ready for use, depreciation starts at the date of transfer.

Projects under construction are carried at historical cost after deducting impairment.

## **C/7 Defined benefit system**

The National Company for Glass and Crystal gives end of service benefits for employees of the company; the right to obtain these benefits is calculated based on the last salary and length of service for employees.

## **C/8 Segment reporting**

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment is a segment by which, provide products or services within a particular economic environment that are subject to risks and returns different from those of segments operating in other economic environments.

The bank does not have any geographical sectors that operate in a different economic framework as of December 31<sup>st</sup> March, 2016.

## **D) Foreign Currency Transactions**

### **D/1 Trade and presentation currency**

The Egyptian pound is the currency of preparation and presentation of the consolidated financial statements.

### **D/2 Transactions and balances in foreign currency**

The banks' accounting records are maintained in Egyptian pounds, transactions in other foreign currencies are recorded at rates of exchange ruling on the transaction date. Monetary assets and the liabilities in foreign currencies are revaluated into Egyptian pounds at the rates of exchange ruling at the balance sheet date, any resultant gain or loss is then recorded in the income statement as follows:

- Net trading income or net income from financial instruments originally classified as a change in fair value through profit and loss according to its type.
- Other operating income/loss for other items.

The changes in fair value of monetary financial instruments denominated in foreign currencies and classified as available for sale (debt instruments) are classified into:

- Differences due to change in amortized cost of the instrument; these are recognized through profit and loss in "Profit/Interest and similar income"
- Differences due to changes in foreign currencies exchange rates; these are recognized through profit and loss in "Other operating income / Expense"
- Differences due to change in fair value of the instrument which re recognized through equity in "Available for sale fair value reserve".

Translation differences on non-monetary items such as equity securities held at fair value through profit or loss are reported as part of the fair value gain or loss translation difference on non-monetary items such as available for sale the income is recorded directly in equity within "Net unrealized gains and losses on available for sale assets" .

## **E) Financial assets**

The bank classifies its financial assets into the following groups:

- Financial assets designated at fair value through profit and loss.
- Financings and receivables.
- Financial investments held to maturity.
- Financial investments available for sale.

The management's classification depends on the purpose of the investments at the time of its purchase.

### **E/1 Financial assets designated at fair value through profit and loss**

This group includes financial assets held for trading

Financial instrument are recorded as held for trading if it is acquired for resale in short term, or if it represents a part of specific financial instrument portfolio that are managed together and there is an evidence for actual recent transactions refers to the gain of income in short term.

Financial assets are recognized in the early recognition at fair value through profit and loss.

In managing some investment portfolio like investment in equity instruments they are evaluated and reported with fair value according to investment strategy or risk management and preparing reports to top management according to these bases, these investments are designated at fair value through profit and loss.

Under all circumstances, the bank does not re-classify any financial instrument into financial instruments measured at fair value through profit and loss or to a group of financial assets held for trading.

### **E/2 Financings and receivables**

Financings and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those:

- That the bank intends to sell immediately or in the short term, which are classified as held for trading, or that classified as financial assets designated at fair value through profit and loss.
- Assets that classified as available for sale in the early recognition.
- That the bank upon initial recognition designates as available for sale or for which the bank may not recover substantially all of its initial investment, other than because of a credit deterioration of the issuer.
- Financings and receivables are measured at fair value in the early recognition and it is the pricing of transaction in which includes cost of the transaction that includes fees and commissions paid to agents, brokers, merchants and advisors.

- Historical probability of default for retail portfolio was calculated according to the realized loss for the past 3 to 6 months and based on average delinquency period for each product. For corporate portfolio, Historical probability of default was calculated as per the rates issued by Moody's for the Middle East for each facility as per its facility risk rating.

### **E/3 Financial Investments held to maturity**

Held to maturity financial investments are non-derivative assets which carry fixed or determinable payments and where the bank has the intention and the ability to hold to maturity. All held to maturity financial investments are reclassified as available for Sale in case of a sale of significant amounts unless the sale is in an emergency situation

### **E/4 Financial investments available for sale**

Available for sale financial investments are non-derivatives financial assets that are intended to be held for unspecified period and may be sold to provide liquidity or due to changes in the prices of shares, foreign currencies, or interest rate.

#### **The following principles are followed for the financial assets**

Purchases or sales of financial assets designated at fair value through profit and loss, held to maturity financial investments, and available for sale financial investments are recognized at the trade date which is the date the bank is committed to purchase or sell the financial asset.

Financial assets that are not classified as designated at fair value through profit and loss at initial measurement are recognize at fair value plus directly attributable costs of acquisition or issue while financial assets designated at fair value through profit and loss at initial measurement are recognized only at fair value, any directly attributable acquisition or issue costs are recorded in the "net trading income" in the income statement.

Financial assets are de-recognized where the rights to receive cash flows from the asset have expired or the bank has transferred all the risks and rewards of the asset to another party, while a financial liability is derecognized when the obligation under the liability is discharged or cancelled or expired.

Available for sale financial investments and financial assets designated at fair value through profit and loss are subsequently measured at fair value.

Held to maturity financial investments are subsequently measured at amortized cost.

Profit and loss due to changes in fair value of financial assets designated at fair value through profit and loss are recorded in income statement during the period it occurred.

Profit and losses arising from changes in fair value of available for sale financial investments are recognized directly in equity, when the asset is disposed of or impaired, the cumulative profit or loss previously recognized in equity is recognized in the income statement.

Monetary assets' interest/profit income is recognized based on the amortized cost method in the income statement. The foreign currency revaluation differences related to available for sale investments are recognized in the income statement. Available for sale equity instruments related to dividends are recognized in the income statement when they are declared.

Fair values are obtained from quoted market prices in liquid markets. Where no active market exists, or quoted prices are unobtainable the fair value is estimated using a variety of valuation techniques, including discounted cash flow and other pricing models. Inputs to pricing models are generally market-based where available and taken from reliable external data sources.

If the range of reasonable fair value estimates is significant and the probabilities of the various estimates cannot be reasonably assessed, an entity can measure the equity instrument at cost minus any impairment losses.

Interest/profit calculated using the effective interest/profit method and foreign currency gains and losses on monetary assets classified as available for sale are recognized in the income statement, Dividends on available for sale equity instruments are recognized in the income statement when the entities right to receive payment is established.

The fair values of quoted investments in active markets are based on current bid prices, If there is no active market for a financial asset, the bank measures the equity instruments that are classified as available for sale at cost net of impairment loss, if any.

The Bank reclassifies the financial asset previously classified as available for sale to which the definition of loans-debts (bonds or loans) applies by means of transferring the category of the instruments available for sale to the category of loans and debts or the financial assets held to maturity, once the Bank has the intention and ability to hold such financial assets in the near future or up to the maturity date, such reclassification is made at fair value as on that date. Any profits or losses related to such assets which have been previously recognized within equity shall be treated as follows:

- Financial assets with fixed or determinable payments and fixed maturity is valued at amortized cost, using the effective interest method in case of impairment the profit/interest and loss that have been previously recognized directly in equity is removed from equity and recognized in the income statement.
- Profit and loss related to financial assets without fixed or determinable maturity are held in equity till sale or disposal of the asset then removed from equity and recognized in the income statement, In case of impairment the profits and losses that have been previously recognized directly in equity are removed from equity and recognized in the income statement.

If the Bank changes its estimates regarding payments or proceeds, the book value of a financial asset (or group of financial assets) has to be adjusted to reflect the actual cash inflows and the change in this estimate through calculating the present value of estimated future cash flows using the effective interest rate for the financial instrument. This adjustment is recognized as either income or expense in the income statement.

In all cases, if the Bank reclassified financial asset in accordance with what is referred to above and the Bank subsequently increase its future cash proceeds estimates resulted from an increase in the recoverable amount from its cash receipts, this increase is recognized as an adjustment to the effective interest rate not as an adjustment in the book value of the asset at the date of change in estimate.

**F) Offset of financial assets and financial liabilities:**

Financial assets and liabilities are offset when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

REPO and reverse REPO agreements represent by net in balance sheet under treasury bills caption.

**G) Profit/Interest income and expenses**

**G/1** Interest income and expense for all interest/profit-bearing financial instruments, except for those classified as held for trading or designated as at fair value through profit or loss, are recognized within 'income from Murabha, Musharka, Mudarba and other similar income and cost of deposits and similar cost in the income statement using the effective profit/interest rate method, The effective profit/interest rate method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the profit/interest income or profit/interest expense over the relevant year.

The effective profit/interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective profit/interest rate, the bank estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options), but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective profit/interest rate, transaction costs and all other premiums or discounts.

When financings or debts are classified as non-performing or impaired, related profit/interest income are not recognized but rather, are carried off balance sheet in statistical records and are recognized as revenues on the cash basis as follows:

- When collected and after recovery of all areas for retail financings, personal financings, real estate financings for personal housing and financings to small business.
- For corporate financings, profit/interest income is also recognized on the cash basis, according to which interest earned during the periods subsequent to reschedule agreements does not start to accrete on the financing principal until the bank collects 25% of the rescheduled installments and after payments of the installments continue to be regular for at least one year, interest income will not be recognized as revenue until full payment of the loan balance before the rescheduling and client is considered to be performing.

**G/2** Revenue is recognized to the extent that bank has a reasonable assurance of the future benefits related to the transaction will be realized and revenue can be reliably measured, revenue is measured by its fair value of the net consideration paid or received after deducting any discount or sales tax or custom fees.

Mentioned below criteria to be taken in consideration before the recognition of revenue:

**Sale of goods:** Revenue derived from the sale of goods when the bank transferred all risks and rewards to the buyer and usually happens when the goods are delivered to the buyer or the common carrier.

## **H) Fees and commission income**

Accrued fees for loans or advances service are recognized as revenue at the time service is provided. Fees and commissions income related to non-performing or impaired loans or debts are suspended and are carried off-balance sheet and are recognized under income according to the cash basis, when interest income is recognized as shown in (H/2)

Fees that represent a complementary part of the effective interest on the financial asset in general and treated as adjustment to the effective interest rate.

**H/1** Commitment fees on loans granted are deferred if there is a possibility that such loans shall be drawn, since the commitment fees received by the Bank are deemed to be a compensation for the ongoing intervention to acquire the financial instrument; subsequently, they are recognized by adjusting the effective interest rate on the loan. In the event of expiry of the commitment year without issuing the loan by the Bank, the fees are recognized as revenues at the expiry of the commitment Year.

**H/2** Fees related to debt instruments which are measured at fair value are recognized under revenue at initial recognition. The fees for promotion of syndication loans are recognized as revenues upon completing the promotion process without retaining any part of the loan by the Bank, or if the Bank maintains a part thereof with the actual interest rate available to other participants.

**H/3** Commissions and fees arising from negotiation, or participating in a negotiation in favour of a third party as in share acquisition arrangements or purchase of securities or purchase or sale of businesses are recognized in the consolidated income statement when the transaction is completed

**H/4** Management advisory and other service fees are recognized as income on a time proportionate basis over the life time of the service.

## **I) Dividends Income**

Dividends are recognized in the income statement when the right to receive dividends is established.

## **J) REPO and reverse REPO agreements**

Financial instruments sold in accordance to re-purchase agreements are recognized as assets added to the balance of treasury bills on the balance sheet. Liabilities under purchase and re-sale agreements are deducted from the balance of treasury bills and the difference between sale price and re-purchase price is recognized as accrued income over the term of the agreement using effective interest method.

## **K) Impairments of financial assets**

### **K/1 Financial assets held with cost to depreciation**

The bank assesses at each balance sheet date whether there is objective evidence that a financial asset or a portfolio of assets is impaired. A financial asset or a portfolio of assets is impaired and impairment losses is incurred if, and only if, there is objective evidence of impairment as a result of one or more loss events that occurred after the initial recognition of the asset and prior to the balance sheet data ('a Loss Event') and that loss event or events has had an impact on the estimated cash flow of the financial asset or the portfolio of financial assets that can be reliably estimated.

## Notes to Consolidated Financial Statements as of 31 March 2016– Continued.

Objective evidence that a financial asset or a portfolio of financial assets is impaired includes observable data that comes to the attention of the bank about the following loss events:

- Significant financial difficulty of the issuer or the obligor.
- A breach of contract, such as a default or delinquency in interest or principal payments.
- It becomes probable that the borrower will enter bankruptcy or liquidation.
- Deterioration of Financial position of the borrower.
- The lender, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider.
- Impairment in the value of guarantee.
- Deterioration of creditworthiness.

A substantive proof for impairment loss of group of financial assets that shows the existence of clear information indicating a measurable decline in the expected future cash flows of such category since initial recognition including such that cannot be separately determined for each individual asset such as increase of default cases with respect to a banking product.

The bank estimates the period between the date on which the loss event has occurred and the date on which the impairment loss has been identified for each specific portfolio. For application purposes, the bank considers this period from 3 months to one year.

The bank first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. Taking into consideration the following:

- If the bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment based on the historical loss rates.
- The bank determines that there is an objective evidence that impairment exist, assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.
- An asset that is individually assessed for impairment but for which an impairment loss is not recognized is included in a group of other similar assets.

Impairment loss is calculated by the difference between the carrying amount and the present value of estimated future recorded cash flow, excluding future expected credit losses not changed yet, discounted at the financial assets' original effective interest rate. This impairment is booked in the income statement as "Impairment loss" and the book value of the financial asset is reduced by the impairment amount using "Impairment loss provision".

If there is objective evidence that an impairment loss on financings and receivables or held-to-maturity investments carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the assets' carrying amount and the present value of estimated future cash discounted at the financial asset's original effective interest rate. The carrying amount of the asset shall be reduced through use of an allowance account. The amount of the loss shall be recognized in profit or loss.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (asset nature, business nature, geographical location, type of collaterals, delay positions, etc.) that are indicative of the debtors' ability to pay all amounts due according to the contractual terms. Provisions are then related to estimate future payments as an indication of the borrowers' ability to fulfill his contract.

When assessing the impairment loss for a group of financial assets on the basis of the historical loss rates, future cash flows in the group are estimated on the basis of the contractual cash flows of the Bank's assets and the historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently.

The bank ensures that estimates of changes in future cash flow reflect the changes in related observable data from period to period. For example, changes in unemployment rates, property price, the position of settlement and any other factors that indicate changes in the probable loss of the group or probable loss in its value.

The methodology and assumptions used for estimating future cash flows are reviewed periodically by the bank to estimate the future cash flow.

## **K/2 Financial investments available for sale and held to maturity date in associates companies**

At each balance sheet date, the bank assesses whether there is objective evidence that any financial asset or group of financial assets that are classified as available for sale has been impaired. A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost is an objective evidence of impairment.

Such decline is presumed to be significant for the equity instruments if it reaches 10% of the cost of the financial instrument, whereas it is presumed a prolonged decline when it extends for a period of more than 9 months.

In respect of available for sale equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized directly in equity. However, if in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss shall be reversed, with the amount of the reversal recognized in profit or loss for that debt instrument.

## **L) Intangible assets**

### **Software (computer programs)**

Expenditure on upgrade and maintenance of computer programs is recognized as an expense in the income statement in the period in which it is incurred. Expenditures directly incurred in connection with specific software are recognized as intangible assets if they are controlled by the bank and when it is probable that they will generate future economic benefits that exceed its cost within more than one year. Direct costs include the cost of the staff involved in upgrading the software in addition to a reasonable portion of relative overheads.

Upgrade costs are recognized and added to the original cost of the software when it is likely that such costs will increase the efficiency or enhance the performance of the computers software beyond their original specification.

Cost of the computer software recognized as an asset shall be amortized over the period of expected benefits which shall not exceed three years.

### **M) Fixed assets**

Lands and buildings comprise the head office premises and branches. All fixed assets are carried at historical cost net of accumulated depreciation and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the fixed assets.

Subsequent costs are included in the assets carrying amount or recognized separately, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the bank and the cost of the item can be measured reliably. Repairs and maintenance expenses are recognized in profit or loss within "other operating costs" line item during the financial period in which they are incurred.

Depreciation is charged on all assets, other than land so as to write off the cost of assets over their estimated useful lives, using the straight-line method to the extent of their estimated residual values based on the following annual rates:

<b>Item</b>	<b>Life time</b>
Buildings	20 years
Decorations and preparations	20 years
Integrated systems & equipment	5 years
Motor vehicles	5 years
Furniture and fittings	10 years
Other equipment	8 years

The residual value and useful life of the fixed assets is reviewed on every balance sheet date and adjusted whenever its necessary.

The bank reviews the carrying amounts of its depreciable fixed assets whenever changes in circumstances or events indicate that the carrying amounts of those assets may not be recovered. Where the carrying amount of an asset exceeds its recoverable amount, the carrying amount is reduced to its recoverable amount.

The recoverable amount of an asset is the higher of the asset's net realizable value or value in use. Gains and losses on disposals are determined by comparing proceeds with relevant carrying amount. These are included in profit or loss in other operating income (expenses) in the income statement.

### **N) Leased assets**

Leased assets are stated at acquisition cost.

The assets are depreciated using the straight line method according to the useful life of the assets starting from the date of usage.

### **O) Investment property**

Investment property is held to earn rentals or for capital appreciation or both. Therefore, an investment property generates cash flows largely independently of the other assets held by an entity.

The following are examples of investment property:

- a.** Land held for long-term capital appreciation rather than for short-term sale in the ordinary course of business.
- b.** A building that is vacant but is held to be leased out under one or more operates leases.

Investment property are treated the same accounting treatment for fixed assets.

### **P) Impairment of non-financial assets**

Non-financial assets that do not have definite useful lives, except for goodwill, shall not be amortized. These are annually tested for impairment. Depreciable fixed assets are tested for impairment whenever changes in circumstances or events indicate that the carrying amounts of those assets may not be recovered.

Impairment loss is recognized and the carrying amount of an asset is reduced to the extent that such carrying amount exceeds the asset's recoverable amount.

For the purpose of estimating the impairment loss, where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

At each balance sheet date, non-financial assets for which an impairment loss is recognized shall be reviewed to assess whether or not such impairment losses should be reversed through profit or loss.

### **Q) Leasing**

This is calculated as per law no. 95 for the year 1995, about finance leasing in case the contract grants the right to the tenant to purchase the asset by a set date and a set value, in addition to contract life covers more than 75% of estimated useful life, or if the fair value of total rental payments represent payments more than 90% of the assets value. Other contracts represent operational rent contracts.

#### **Q/1 Rent**

As for leasing contracts, the expense of rent in addition to maintenance, is recognized as expenses in the under income statement, If the bank decides upon the usage of its right in purchasing the rented assets, the expenses of purchase is capitalized and depreciated over the remaining useful life the same way as other assets are depreciated

The payments are recognized under operational rent decreased by the amount of any payments received within the stated period, registered in the income statement as steady installments.

### **R) Cash and cash equivalents**

For the purposes of the cash flows statement, cash and cash equivalents comprise balances due within three months from date of acquisition; they include cash and balances due from central bank of Egypt, other than those within the mandatory reserve, current accounts with banks and treasury bills.

## **S) Other provisions**

Provisions for restructuring costs and legal claims are recognized when the Bank has a present legal or constructive obligation as a result of past events; it is more likely than that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated.

Where there are a number of similar obligations, the likelihood that an outflow is required to settle an obligation is determined taking into consideration the group of obligations as a whole.

A provision is recognized even if the likelihood of an outflow with respect to any obligation in the group is minimal.

When a provision is wholly or partially no longer required, it is reversed through profit or loss under other operating income/expenses.

Provisions are measured at the present value of the expected required expenditures to settle obligations after one year from financial statement date using the appropriate rate in accordance with the terms of settlement ignoring the tax effect which reflects the time value of money. If the settlement term is less than one year the provision is booked using the present value unless time consideration has a significant effect.

## **T) Taxes**

Taxes include income taxes and deferred taxes, both are recognized in the income statement except for income tax relating to the owners' equity, which is recognized directly within the owners' equity statement.

The bank's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period, in addition to income tax adjustments related to previous years.

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. However, when it is expected that the tax benefit will increase, the carrying amount of deferred tax assets shall increase to the extent of previous reduction.

## **U) Employees Benefits**

### **U/1 Employees saving insurance fund**

In the first of July 2013 the bank established a private social insurance fund (Alsondoq) according to the law number 54 for the year 1975 "private insurance funds law and the regulations", The bank has registered the fund in 14 January of 2014 with a number of registration (884), Working in this fund started on the first of April 2014, terms and modification of the fund is applied on the employees working in the head office of the bank and its branches in the Arab republic of Egypt.

The bank is committed to pay the subscriptions to the fund monthly calculated according to the rules of the fund and its modifications. Generally the fund is financed through the monthly subscriptions and some other resources specified in fund's list.

The insurance benefits will be paid when the member reaches end of service due to retirement or death or total or partial disability, In case the term of membership is less than 3 years, the member will receive his contribution balance paid by himself to the fund on the date of retirement or membership.

### **U/2 Legacy staff medical benefit plan**

The Bank has a Defined Benefit Medicare Plan for its legacy employees during their service period and post retirement, the liabilities of this system represent in the present value of its liabilities minus its assets at the end of each period including the actuarial loss and revenues settlements and also the prior year cost.

The liability determined by independent actuarial expert using the Projected Unit Credit method.

The fair value of the liabilities are determined by the projected forecasted cash outflow using discount rate of governmental bonds with maturities similar the maturity of liability. The liability recorded in other liabilities.

The actuarial revenues or losses arising from experience change in actuarial assumptions and amendments in the medical plan are hitting the income statement. The bank applies the monthly payment method to the medical plan for current employees; these payments hit the income statement in employee's benefits item.

## **V) Comparative figures**

Comparative figures are reclassified, where necessary, for consistency with changes in the current year's presentation.

### **3- Management of financial risks**

The bank, as a result of conducting its activities, is exposed to various financial risks. Since financial activities are based on the concept of accepting risks and analyzing and managing individual risks or group of risks together, the bank aims at achieving a well-balanced risks and relevant rewards, as appropriate and to reduce the probable adverse effects on the bank's financial performance. The most important types of risks are credit risk, market risk, liquidity risk and other operating risks. The market risk comprises foreign currency risk, interest rate risk and other pricing risks.

The risk management policies have been laid down to determine and analyze the risks, set limits to the risk and control them through reliable methods and up-to-date systems. The bank regularly reviews the risk management policies and systems and amendments thereto, so that they reflect the changes in markets, products and services and the best up-to-date applications.

Risks are managed in accordance with preapproved policies by the board of directors; the risk management department identifies, evaluates and covers financial risks, in close collaboration with the bank's various operating units.

The board of directors provides written rules which cover certain risk areas, such as credit risk, foreign exchange risk, interest rate risk and the use of derivative and non-derivative financial instruments.

#### **3/1 Credit risk**

Credit risk is the risk that one party will fail to discharge an obligation and will cause the other party to incur a financial loss. The bank deems financings to customers, banks and financial investments in terms of bills, current accounts, deposits at banks, as financial assets exposed to credit risk of settling part or all of the dues by the concerned parties on the maturity date. Credit risk also exists on items not registered in the balance sheet such as financing commitments. Management processes and credit risk controls are the main concern of the credit risk management team in Risk Department, who reports to the Board of Directors, senior management and heads of each business unit.

#### **3/1/1 Measurement of credit risk**

##### **Financings and facilities to clients**

To evaluate credit risk relating to financings and facilities to banks and/or clients the following 3 components are to be considered:

- Probability of default – by the client or counter party on its contractual obligations.
- Exposure at default – current exposure to the counter party and its likely future developments from which the bank derive the exposure at default.
- Loss given default

The banks daily activities include measurement of credit risk, which reflects estimated loss (expected loss model) required by Basel banking observatory committee, a conflict could generate between operational measurements and impairments as per the Egyptian Accounting Standards (no 26), which recognizes losses encountered on balance sheet (Recognized losses) rather than "Expected loss" (note 3/1/3).

## Notes to Consolidated Financial Statements as of 31 March 2016– Continued.

The bank evaluates each client through a detailed weight categorization; these methods have been developed for internal evaluation usage and for analysis to reach the appropriate weighting. The banks clients have been categorized to 4 categories, reflecting the delay in payment, therefore clients could move between the various categories depending on evolving circumstances. The bank frequently and periodically reviews the efficiency of this method to estimate any delay cases.

### Internal categories:

<u>Category</u>	<u>Description</u>
-----------------	--------------------

1	Good debts
2	Regular follow up
3	Special follow up
4	Bad debts

- Exposure at default is based on the amounts the bank expects to be outstanding at the time of default.
- The estimated loss, is the loss incurred when delay in payment occurs, being a percentage of financing which differs depending upon client, nature of claim, available collaterals and guarantees.

### Debt instruments and treasury bills

The bank in this case uses external categorization, such as standard and poor or other equivalents. If external classification is not available, the method of credit risk is followed. The investment in those securities and bills are viewed as a way to gain a better credit quality mapping and maintain a readily available source to meet the funding requirements at the same time.

### 3/1/2 Minimization and avoidance of risk

The Bank manages limits and controls concentration of credit risk wherever they are identified – in particular, to individual counterparties and banks, and to industries and countries. The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical and industrial segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review, when considered necessary. Limits on the level of credit risk by individual, counterparties, product, and industrial sector and by country are approved quarterly by the board of directors.

The exposure to any one borrower including banks is further restricted by subsidiary limits covering on- and off-balance sheet exposures, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored daily.

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate. some other specific control and mitigation measures are outlined below:

### Collaterals

Several rules and policies are stated by the bank to minimize credit risk, one of which is collaterals, the bank specifies guidelines for certain types of collaterals. Major types are as follows:

- Real estate mortgage
- Operating asset mortgage such as machinery and goods
- Mortgage of financial instruments such as: securities or equities

## Notes to Consolidated Financial Statements as of 31 March 2016– Continued.

Usually the long term facilities and corporate are with collaterals, while credit for retail are without collaterals to minimize any losses to minimal, The bank seeks extra collaterals from related parties if a sign of impairment of any financing or facility occurs.

Collaterals are taken as a guarantee for other assets except for financial and facilities and usually, treasury bills and securities are with no collaterals, except for financial pools covered by asset-backed securities and similar guaranteed by financial instruments.

### Commitments related to credits

The major need for commitments related to credits is for the client to have liquidity when needed. Guarantees and standby letters of credit issued by the bank on behalf of the client, to grantee a third party the right to withdrawal from the clients account within a certain limit.

Usually this is guaranteed by shipped merchandise or goods therefore the risk weight is less than direct financings.

Credit commitments represent the hidden unused part of the risk tolerated by the bank such as granting financings, LCs and LGs, the bank then is subject to losses to equal value of credits. Losses indorsed by unused credits are less than the value, due to facilities being granted for possible commitments for a specific client with certain conditions. The bank observes the credits till maturity date (long term credits hold a higher risk weight).

### 3/1/3 Impairment & provisioning policies

Internal rating system mentioned earlier (Note 3/1/1) focuses more on planning the quality of credit process and this in the beginning of investing and financing activities, other than that. Impairment losses is recognized only on the balance sheet date for financial reporting purposes according to the objective evidence of impairment as per noted in this disclosure and due to the difference in methodologies applied, usually impairment losses that is reported as per Central bank of Egypt laws and regulations using the estimated losses model is higher than those charged to the financial statements (note 3/1/4).

Impairment loss provisions stated on the end of period balance sheet are extracted from the categorized weight risk rating. Provisions are mainly calculated for credits holding the lowest category. The following table clarifies the percentage upon which the provisions are calculated as of 31 March 2016 related financing and facilities and impairment loss provision related to the internal bank rating:

Banks rating	31 March 2016		31 December 2015	
	Loans and facilities	Impairment loss provisions	Loans and facilities	Impairment loss provisions
Good debts	80%	21%	81%	25%
Regular follow up	14%	11%	13%	11%
Special follow up	0%	1%	0%	1%
Bad debts	5%	66%	6%	63%
	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

## Notes to Consolidated Financial Statements as of 31 March 2016– Continued.

Internal evaluation helps to clarify if there are any significant indications existing for provisions, as per Egyptian accounting standards no. 26, guided by the following points set by the bank:

- Financial problems faced by the client.
- Breaching of financing contract for example overdue installments.
- Prediction of bankruptcy or liquidation or financial restructure.
- Deterioration of competitive position.
- The bank granting superior or extraordinary facilities that the bank could normally not agree upon.
- Impairment of the collateral
- Deterioration of credit status.

The bank's policy includes revising all the bank's assets (exceeding a certain percentage of importance) at least once per year or more if needed.

Loss is evaluated at the balance sheet date on all major accounts. Evaluation normally includes the existing collateral, verifying all payments and withdrawals from the account. Impairment loss is charged on similar assets; historical expertise, personal judgment statistical methods.

### **3/1/4 Model of general risk measurement**

In addition to the 4 categories stated in note 3/1/1, the management takes on several other detailed measurements, to comply with the CBE requirements. Assets exposed to risk are categorized as per the CBE's conditions and instructions, mainly related to on the client, such as: activity, financial position, payment stability.

The bank calculates the impairment of assets exposed to credit risk, including commitments relating to credit on the basis of rates determined by CBE. In case, the required for impairment losses as per CBE credit worthiness rules on 16 September 2008 exceeds the provisions as in note (17), that excess shall be debited to retained earnings and carried to the general reserve for banking risks in the equity section.

Such reserve is always adjusted, on a regular basis, by any increase or decrease so that the reserve shall always be equivalent to the amount of increase between the two provisions. Such reserve is not available for distribution (note 33/3) and shows the movement on the general reserve for banking risks during the financial period.

As follows is the statement of credit rating for corporations as per the bank's internal ratings as compared with those of CBE's, it also includes the percentages of provisions required for impairment of assets exposed to credit risk.

**Notes to Consolidated Financial Statements as of 31 March 2016– Continued.**

<b>CBE rating</b>	<b>CBE rating description</b>	<b>Required provision %</b>	<b>Internal rating</b>	<b>Internal rating description</b>
1	Low risk	0%	1	Good debts
2	Moderate risk	1%	1	Good debts
3	Satisfactory risk	1%	1	Good debts
4	Appropriate risk	2%	1	Good debts
5	Acceptable risk	2%	1	Good debts
6	Marginally acceptable risk	3%	2	Regular Follow up
7	Risk needs special attention	5%	3	Special Follow up
8	Substandard	20%	4	Non performing financing
9	Doubtful debts	50%	4	Non performing financing
10	Bad debts	100%	4	Non performing financing

**3/1/5 Maximum limit for credit risk before guarantees**

**5/A Maximum limit for credit risk before guarantees**

	<b>31 March 2016 LE 000's</b>	<b>31 December 2015 LE 000's</b>
<b><u>Balance sheet items exposed to credit risks</u></b>

Documentary credit	<b>250,989</b>	108,385
Bank guarantees	<b>592,157</b>	517,525
<b>Total (Note 35-2)</b>	<b>2,376,959</b>	1,579,711

The above table represents the maximum limit of risks to be exposed to at the end of 31<sup>st</sup> March, 2016 and without taking into consideration any guarantees, for balance sheet items, amounts stated depends on the net carrying amount shown in the balance sheet.

## Notes to Consolidated Financial Statements as of 31 March 2016– Continued.

As shown in the preceding table, 58.37 % (December 31<sup>st</sup>, 2015: 60.54 %) of the maximum limit exposed to credit risk results from financings and facilities to customers.

The management is confident in its ability to maintain control on an ongoing basis and maintain the minimum credit risk resulting from financing portfolio, facilities, and debt instruments as follows:

- 94 % (December 31<sup>st</sup>, 2015: 94%) of the financings and facilities portfolio are rated on the highest 2 levels of the internal rating.
- 78.77 % (December 31<sup>st</sup>, 2015: 80.30%) of the financing portfolio and facilities having no arrears or indicators of impairment.
- Financings and facilities valued on a standalone basis amounting to LE 708mn (December 31<sup>st</sup>, 2015: LE 711mn) with impairment less than 5.57% from its value against (December 31<sup>st</sup>, 2015: LE 5.91%).
- The bank applied more prudential selection process on granting financings and facilities during the financial Period ended at March 31<sup>st</sup>, 2016.
- More than 100% of investments in debt instruments and treasury bills represent debt instruments due from the Egyptian government.

### 3/1/6 Financing and facilities

The status of balances of financing in terms of credit rating is as follows:

	31 March 2016 LE 000's Financing and facilities to customers	31 December 2015 LE 000's Financing and facilities to customers
Neither past due nor impaired	10,023,548	9,660,053
Past due not impaired	1,993,540	1,658,721
Subject to impairment*	708,231	710,688
<b>Total (note 17)</b>	<b>12,725,319</b>	<b>12,029,462</b>
<b>Less:</b>		
Impairment loss provision**	(330,287)	(312,943)

### **3/2 Market risk**

The bank exposed to market risks which is the risk that the fair value or future cash flow fluctuation resulted from changes in market prices. Market risks arise from open market related to interest rate, currency, and equity products of which each is exposed to general and specific market movements and changes in sensitivity levels of market rates or prices such as interest rates, foreign exchange rates and equity instrument prices. The Bank divides its exposure to market risk into trading and non-trading portfolios.

Bank treasury is responsible for managing the market risks arising from trading and non-trading activities of which monitored by two separate teams. Regular reports about market risk are submitted to the Board of Directors and each business unit head periodically.

Trading portfolios include transactions where the Bank deals direct with clients or with the market; Non-trading portfolios primarily arise from managing assets and liabilities interest rate price relating to retail transactions. Non-trading portfolios also includes foreign exchange risk and equity instruments risks arising from the Bank's held-to-maturity and available-for-sale investments portfolios.

#### **3/2/1Market risk measurement techniques**

The following are the major measurement techniques used:

##### **A. Value at risk:**

The Bank applies a 'value at risk' methodology (VAR) for trading and non-trading portfolios to estimate the market risk of positions held and the maximum expected losses based on a number of assumptions for various changes in market conditions. The Board sets separate limits for the value of risk that may be accepted by the Bank for trading and non-trading portfolios and monitored by the market risk department.

VAR is a statistical estimation of the expected losses on the current portfolio from adverse market movements in which it represents the 'maximum' amount the Bank expect to lose using confidence level (98%). Therefore there is statistical probability of (2%) that actual losses could be greater than the VAR estimation. The VAR module assumes that the holding year is 10 days before closing the opening position. It also assumes that market movements during the holding year will be the same as 10-days before. The Bank's assessment of past movements is based on data for the past five hundred days. The Bank applies these historical changes in rates prices indicators....etc. directly to its current positions this approach called historical simulation. Actual outcomes are monitored regularly to test the validity of the assumptions and factors used in the VAR calculation.

The use of this approach does not prevent losses from exceeding these limits if there are significant market movements.

As VAR considered a primary part of the Bank's market risk control technique VAR limits are established by the Board annually for all trading and non-trading transactions and allocated to business units. Actual values exposed to market risk are compared to the limits established by the bank and reviewed by the ALCO committee.

The average daily VAR for the Bank during the current

The quality of the VAR model is continuously monitored through examining the VAR results for trading portfolio and results are reported to the top management and Board of Directors.

## B. Stress testing:

Stress testing provides an indicator of the expected losses that may arise from sharp adverse circumstances Stress testing are designed to match business using standard analysis for specific scenarios. The stress testing carried out by the Bank treasury. Stress testing include: risk factor stress testing where sharp movements are applied to each risk category and test emerging market stress, as emerging market portfolios are subject to sharp movements; and subject to special stress including possible stress events to specific positions or regions - for example the stress outcome to a region applying a free currency rate.

The results of the stress testing are reviewed by top management and Board of directors

### 3/2/2 VAR summary

#### Total value at risk according to type of risk

	Value in LE 000's			Value in LE 000's		
	3 Months to 31 March 2016			12 Month to 31 December 2015		
	Average	High	Low	Average	High	Low
Foreign currency risk	151	-	-	191	-	-
Interest rate risk	44,720	-	-	184,754	-	-
<b>Total value upon risk</b>	<b>44,871</b>	-	-	<b>184,946</b>	-	-

#### **Total value at risk for trading investment held for trade:**

	Value in LE 000's			Value in LE 000's		
	3 Months to 31 March 2016			12 Month to 31 December 2015		
	Average	High	Low	Average	High	Low
Foreign currency risk	151	-	-	191	-	-
<b>Total value upon risk</b>	<b>151</b>	-	-	<b>191</b>	-	-

#### **Total value at risk for Non-trading investment held for trade upon type of risk:**

	Value in LE 000's			Value in LE 000's		
	3 Months to 31 March 2016			12 Month to 31 December 2015		
	Average	High	Low	Average	High	Low
Interest rate risk	44,720	-	-	184,754	-	-
<b>Total value upon risk</b>	<b>44,720</b>	-	-	<b>184,754</b>	-	-

The increase in VAR especially the interest rate risk mainly proportion to the increase in market interest rates volatility in the global financial markets.

The above three VAR results (average, high and low) are calculated independently from the underlying positions and historical market movements. The aggregate of the trading and non-trading VAR results does not represent the bank's VAR due to correlations of risk types and portfolio types and their effect.

**Notes to Consolidated Financial Statements as of 31 March 2016– Continued.**

**3/2/3 Foreign exchange volatility risk**

The Bank is exposed to foreign exchange rate volatility risk in terms of the financial position and cash flows. The Board of Directors set aggregate limits for foreign exchange in the total value (summation value) for each position at the end of the day, and during the day which is controlled on timely basis.

The following table summarizes the Bank' exposure to foreign exchange volatility risk at the end of the financial period

The following table includes the carrying amounts of the financial instruments in their currencies:

**31 March 2016**

	Value/ Equivalent in LE 000's						
	EGP	USD	Euro	Sterling	Yen	Others	Total

### 3/2/4 Profit rate risk

The Bank is exposed to profit rate risk which is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market profit rates. Fair value profit rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Bank is exposed to the effect of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Profit margins may increase as a result of such changes but may profit decrease in the event that unexpected movements arise. The Board of Director sets limits on the level of mismatch of interest rate reprising that may be undertaken which is monitored daily by Bank risk department

The following table summarize the extend that the bank is exposed to fluctuation in profit rate that includes the book value for the financial instruments distributed on repricing dates or maturity date which is closest;

	Value in LE 000's

### **3/3 Liquidity risk**

Liquidity risk represents difficulty encountering the Bank in meeting its financial commitments when they fall due and replace funds when they are withdrawn. This may results in failure in fulfilling the Bank obligation to repay to the depositors and fulfilling lending commitments.

#### **Liquidity risk management process**

The Bank's liquidity management process carried out by the Bank risk department includes:

- Daily funding managed by monitoring future cash flows to ensure that all requirements can be met when due. This includes availability of liquidity as they due or to be borrowed to customers. To ensure that the Bank reaches its objective the Bank maintains an active presence in global money markets.
- The Bank maintains a portfolio of highly marketable and diverse assets that assumed to be easily liquidated in the event of an unforeseen interruption of cash flow.
- Monitoring liquidity ratios in relation with internal requirements and central bank of Egypt requirements.
- Managing financing and facilities concentration and dues.

For monitoring and reporting purposes The Bank calculates the expected cash flow for the next day, week and month which are the main time Spain to manage liquidity.

The starting point to calculate these expectations is analyzing the financial liabilities dues and expected financial assets collections.

Its' role is also to monitor the liquidity gaps between average maturity assets and the level and type of unused financing commitments, the ratio of usage of debit current accounts, and the effect of contingent liabilities such as LCs and LGs.

#### **Funding strategy**

Liquidity resources are reviewed through a separate team at the risk department to maintain wide diversification by currencies, geographical location, sources as well as maturities.

Assets available to meet all liabilities and cover financing commitments include cash, balances with the central bank, Balances due from banks, treasury bills and financings and facilities to banks and customers. Moreover, some financing and facilities to customers may be extended during the normal course of business of the bank. The bank has the ability to meet unexpected net cash flows through selling financial papers, and finding other financing sources.

The CBE regulations require compliance with the following:

- Maintaining LE 500mn as a minimum requirement for the authorized and issued capital.
- Maintaining a ratio between capital elements, asset and contingent liability elements weighted by risk weights at 10% or more.

The capital adequacy ratio consists of the following two tiers:

**Tier 1:**

It is the basic capital comprising of paid up capital (after deducting the carrying amount of the treasury stocks), retained earnings, reserves resulting from profit appropriations except the general banking risk reserve less any goodwill previously recognized and any carried forward losses.

**Tier 2:**

Is the sub-ordinate capital comprising the equivalent of the general bank risk reserve in accordance with CBE credit rating deposits not more than 1.25 % of total assets and contingent liabilities (weighted credit risk rates), subordinate deposits / financings maturing after more than 5 years (amortizing 20% of their value each year), and 45 % of the increase between the fair value and carrying amount for the available for sale investments, investments held to maturity, and investments in affiliates and subsidiaries.

The numerator of capital adequacy ratio calculation has to consider:

- Subordinated capital not exceed the basic capital.
- Subordinated financing (deposits) not exceed half basic capital.

Assets are risk weighted in a range from 0% to 100 % according to the type of asset, to reflect related credit risk taking into consideration cash guarantees; the same treatment is used for the off-balance sheet amounts after making relevant adjustments to reflect the contingent nature and the potential loss for these amounts.

The bank has complied with all the capital requirements during the period. Following is a table summarizing capital and capital adequacy ratio:

### **3/4 Leverage Financial Ratio**

Central Bank of Egypt Board of Directors had approved in its meeting held on 7 July, 2015 special supervisory instructions related to leverage ratio which maintain a minimum level of leverage ratio of 3% to be reported on quarterly basis as following:

- Guidance ratio starting from reporting year end December 2015 till December 2017.
- Obligatory ratio to start from year 2018.

This ratio will be included in Basel requirement tier 1 (minimum level of capital adequacy ratio) in order to maintain the Egyptian Banking System strong and safe, as long as to keep up with the best international regulatory treatments. Leverage financial ratio reflect relationship between tier 1 for capital that is used in capital adequacy ratio (After Exclusions) and other assets (on balance sheet and off-balance sheet) that are not risk weighted assets.

#### **Ratio Elements:**

##### **Ratio Elements**

##### **A-The numerator elements**

The numerator consists of tier 1 for capital that is used in capital adequacy ratio (After Exclusions) in accordance with the requirements of the regulatory authority represented by the Central Bank of Egypt (CBE).

##### **B-The denominator elements:**

The denominator consists of all bank assets (on balance sheet and off-balance sheet) as per the financial statements "Bank exposure" which includes the total of the following:

- 1-On balance sheet exposure items after deducting some of tier 1 exclusions for capital base
- 2-Derivatives contracts exposures.
- 3-Financing financial notes operations exposures.
- 4-Off-balance sheet items (weighted by credit conversion factor)

### 3/4 Leverage Financial Ratio Continued

The tables below summarize the leverage financial ratio:

	31 March 2016 LE 000's	31 December 2015 LE 000's

<b>Total exposures on-balance sheet and off-balance sheet (2)</b>	<b>28,083,463</b>	24,595,820
<b>Leverage financial ratio (1/ 2)</b>	<b>3.65%</b>	3.94%

#### **4- Significant accounting estimates**

The bank undertakes estimations and judgments that affect the value of assets and liabilities that has been disclosed during the next financial period, consistently estimations and judgments are based on historical experience and other factors, including the expectations of future events that are reasonably estimated in accordance with the available information and circumstances.

##### **4/1) Impairment loss for financings and facilities**

The bank reviews the portfolio of financings and facilities on at least a quarterly basis. The bank uses discretionary judgment on determining whether it is necessary to record impairment in the income statement using reliable data indicating measurable decline in the expected future cash flows from financing portfolio before identifying any decline at the level of one financing. This evidence include data indicating negative change in the ability of a portfolio of borrowers to repay the bank, or local and economic circumstances related to default. On scheduling future cash flows, the management use estimates based on previous experience related to impairment of assets having credit risks. Such experience refers to impairment similar to that of the portfolio in question.

The methods and assumptions used in estimating both the amount and timing of the future cash flows are reviewed on a regular basis to minimize any discrepancy between the estimated loss and actual loss based on given experience.

##### **4/2) Impairment loss of equity instruments available for sale**

In the case of investment in available for sale equity instrument, a significant or prolonged decline in the fair value of the security below its cost is considered as impairment. Where such evidence exists, significant or prolonged decline needs a personal judgment. To make this judgment the bank assesses- besides other factors- the common share price volatility. In addition, impairment exists when there is objective evidence that a certain company has a financial difficulty in its cash flow from operating and financing activities, industry tool or sector or technological advances.

##### **4/3) financial investments held to maturity**

Non-derivative financial assets with fixed or determinable payments and fixed maturity are classified as investments held to maturity. This category requires personal judgment and therefore the bank tests whether there is a genuine intent and ability to hold such investments to maturity. If the bank fails to hold such investments till maturity (except for certain tightly defined circumstance such as if an entity sells an insignificant amount of held to maturity investments close to maturity date), investments should be reclassified as available for sale, which will be measured at fair value instead of amortized cost.

<b>Total</b>	<b>(10,274)</b>	(9,448)

### **37/1 Private insurance fund**

At the first of July 2013, the bank established private insurance fund (the fund) according to Law No.54 for year 1975, the fund registered in EFSA on 14 January 2014 with No. (884), on 1 April 2014 the fund started its work. The employees in the head office and all branches are committed to the fund regulations.

The bank obligated to pay monthly contributions, in which, calculated according to fund regulation, generally the fund financed through monthly contributions in addition to other resources that detected in fund regulation.

The insurance benefits will be paid when the member reaches end of service due to retirement or death or total or partial disability, In case the term of membership is less than 3 years, the member will receive his contribution balance paid by himself to the fund on the date of retirement or membership.

Through March 2015 EFSA has approved to start investing the monthly contributions accrued to employees and depositing the amount in the fund manager investment account.

### **37/2 Legacy staff medical benefit plan**

The Bank has a Defined Benefit Medicare Plan for its legacy employees during their service period and post retirement, the bank hired independent actuarial expert to conduct the study and determine the necessary amount of the obligation to be recorded in financial statements using the projected unit credit method.

- The main assumptions are used by the actuarial expert listed as follows:-
- Death rate from British table A49-ULT52
- Inflation rate 14%
- Discount rate 12.5%
- Using projected unit credit method in calculating liabilities

### **37/3 End of service fund - Defined benefit plan for employees in National Company for Glass and Crystal**

The national company for Crystal and Glass has End of service Defined benefit plan for workers. The company has assigned an independent actuarial expert to estimate the obligations resulting from the end of service mentioned above applying the total present value method of end of service reward discharged when the employees stay at work until they reach the legal age of retirement or death prior to that calculated in accordance with the terms of the actual service until 12/31/2014 and inserted at an annual salary until the end of the service.

The main assumptions used by the actuarial expert were represented as follows:

- The life rate according to the British table A67-70ULT of life rates.
- Discount rate 12%
- According to the restated labor law which were decided to have a minimum annual premium of 7% has been considered that rate of 7% calculated annually
- Legal retirement age is 60 years.

The expense of the liability was charged to the accumulated losses according to the Egyptian accounting standard No. 5 (Accounting policies and changes in accounting estimations and faults).

### **38- Tax position**

#### **Tax position for ADIB - EG**

##### **Corporate tax:**

- Tax inspections for the years prior 2008 have been fully completed and all due taxes have been paid and the internal committee was set and no due taxes were reported.
- The tax authority has inspected the corporate tax due for the period from 2009 till 2012 and informed the bank through form no. 19A. The bank objected the deemed tax claim at the due date.
- The bank prepared and presented the tax return for the years till 2013 to the tax authority as per law no. 91 for the year 2005.
- Starting from February 2012, and based on the Banks legal and tax advisor, the Bank raised a legal case against the unconstitutional nature of taxes on Treasury Bills and Treasury Bonds for taxable loss making entities during the loss years from 2010 up to 2012 accordingly the Bank suspended paying those taxes and its related penalties, which is recorded under other debit balances” note (no.21) to the financial statements. As per the Bank’s tax and legal advisors opinions that it is probable that the bank will win such legal case, noting that the legal case session was not determined yet.
- The bank accrued for Treasury Bills and Treasury Bonds income tax for the periods with taxable net income.

##### **Salary tax:**

- Tax inspections and internal committee for the years prior 2008 has been finalized and no tax due for this period
- The tax authority inspection and settlement took place for the period since 2009 till 2012 and all taxes due were paid in full.
- The bank pays the payroll taxes on monthly basis on the due dates as stated by law.

##### **Stamp duty tax**

##### **First: In light of law no. 111 for the year 1980 (before amendments)**

- Inspection of all 18 branches of Upper Egypt branches has been finalized starting from opening date of those branches till 31/7/2006 and with all tax liabilities has been settled.
- Inspection of 15 out of 20 of East Delta branches has been finalized from opening of the branches till 31/7/2006 with all tax liabilities settled.
- Inspections of 12 out of 14 West Delta branches have been finalized from opening of the branches till 31/7/2006 with all tax liabilities settled.
- Inspection of 12 out of 17 Cairo branches has been finalized from start of their activities to 31/7/2006. Tax liabilities for 10 branches were settled and 7 branches are still under settlement after tax disputes.
- The bank raised appeal in the court For 45 branches. The bank paid all the branches’ due settlement to avoid delay penalties since the court appeal does not stop the tax liability due.

### **38-Tax position - Continued**

#### **Second: In light of law no. 143 for the year 2006 amended by law 111 of 1980 (After amendments)**

- Inspections of the bank branches have been completed for the years starting 1/8/2006 to 31/12/2007. A tax claim has been raised and the bank objected on it, an internal committee has been formed and transferred to appeal committee.

#### **Sales tax:**

- Inspection of the bank branches from 2002 till 2006 has been finalized and all taxes due were paid.
- Year 2007 up to 2011, the tax inspection is in process till 31 December 2011, All supporting documents has been submitted to the tax authority, the bank is still waiting for tax authority claims.

#### **Real estate Tax**

- The bank received claims for real estate tax for some branches and the bank objected on these claims in the legal deadlines.

#### **Tax position for National Company for glass and crystal**

##### **Corporate tax**

Tax inspections for the years prior 2006 have been fully completed and all due taxes have been paid. Company books have not been inspected from beginning of their activities from 2007 till 2014 noting that there are accumulated tax losses.

##### **Sales tax**

Tax inspections for the years prior to 2012 have been fully completed all due taxes have been paid. Company books have not been inspected for year ended 2013 and 2014.

##### **Salary tax**

Tax inspections for the years prior 2004 have been fully completed and all due taxes have been paid. Company books have not been inspected from 2005 till 2014.

##### **Stamp duty tax**

Tax inspections for the years prior 2012 have been fully completed and all due taxes have been paid. Company books have not been inspected for year ended 2013 and 2014

#### **Tax position for national company for trading and development (ENTAD):**

##### **Sales tax**

Tax inspection has been completed up to 31 December 2011. The company received form (15) which includes the inspection results and presented checks to pay all due amounts.

### **38-Tax position - Continued**

#### **Stamp duty tax**

Tax inspection for the periods prior to 31 December 2005 has been fully completed and all due taxes have been paid.

#### **Salary tax**

- Period from the beginning of the activity till 31/12/2004:
