Description	Pages
Auditors' report	1 - 2
Separate balance sheet	3
Separate statement of income	4
Separate statement of changes in shareholders' equity	5
Separate statement of cash flows	6 - 7
Accounting policies and notes of the separate financial statements	8 - 73

AUDITORS' REPORT

To the shareholders of Abu Dhabi Islamic Bank - Egypt (S.A.E)

Report on the Separate Financial Statements

We have audited the accompanying separate financial statements of Abu Dhabi Islamic Bank - Egypt (S.A.E) which comprises the separate financial position as at 31 December 2017 and the related separate statements of income, changes in equity and separate cash flows for the financial year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Separate Financial Statements

These separate financial statements are the responsibility of Bank's management. Management is responsible for the preparation and fair presentation of these financial statements in accordance with the rules of preparation and presentation of the banks' financial statements, basis of recognition and measurement issued by Central Bank of Egypt on 16 December 2008 and its explanatory instructions and in light of the prevailing Egyptian laws and regulations, management responsibility includes designing, implementing and maintaining internal control relevant to the preparation and fair presentation of separate financial statements that are free from material misstatement, whether due to fraud or error; management responsibility also includes selecting and applying appropriate accounting policies, and making accounting estimates that are reasonable in the circumstances.

Auditors' Responsibility

Our responsibility is to express an opinion on these separate financial statements based on our audit. We conducted our audit in accordance with the Egyptian Standards on Auditing and in the light of the prevailing Egyptian laws. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the separate financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the separate financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the separate financial statements.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Abu Dhabi Islamic Bank - Egypt (S.A.E) as of 31 December 2017 and of its financial performance and its consolidated cash flows for the year then ended, in accordance with the rules of preparation and presentation of the banks' financial statements, basis of recognition and measurement issued by Central Bank of Egypt on 16 December 2008 and its explanatory instructions and in light of the prevailing Egyptian laws and regulations related to the preparation of these consolidated financial statements.

Emphasis of a Matter

Without qualifying our report, we draw your attention to:

- 1- As indicated in note no. (38) to the consolidated financial statements, the Bank's management solely filed a new lawsuit during the year of 2017 to the administrative court, based on the same grounds that the previous lawsuit was based on, regarding the unconstitutional nature of the tax on interest on treasury bills and treasury bonds on the basis that the Bank has not recognized taxable profits for the disputed years and to recover all amount which were previously paid. According to the Bank's external legal and external tax advisors' opinion, it is probable that the Bank will win the case.
- 2- As indicated in note no. (30) to the consolidated financial statements, the Bank's management formed a probable claims provision of balance L.E 1,515 Million based on the Bank's external legal advisor opinion to cover the potential claims from Abu Dhabi Islamic Bank- UAE.

Report on Legal and Other Regulatory Requirements

We were not aware of any non-compliance cases of the central bank, banking and monetary institution law No.88 of 2003 nor of its articles of incorporation were noted.

The Bank maintains proper books of accounts, which include all that is required by law and by the statutes of the Bank, the consolidated financial statements are in agreement thereto.

The financial information included in the Board of Directors' report which is prepared according to law no. 159 of 1981 and its executive regulations, is in agreement with the books of the Bank insofar as such information is recorded therein.

Cairo; 22 February 2018.

- The accompanying notes from (1) to (36) are integral part of these separate financial statements.

Notes to the Separate financial statements as of 31 December 2017

1- General information

Abu Dhabi Islamic Bank – Egypt (formerly National Bank for Development - SAE) was established in 1974 in accordance with Investment Law No. 43 of 1974 and its executive regulations and the amendments thereon in Arab Republic of Egypt 9, Rostom Street Garden City and the bank is listed on the Egyptian Stock Exchange (EGX).

Abu Dhabi Islamic Bank - Egypt is subject as a financial institution to the supervision and control of the Central Bank of Egypt (CBE). In addition, as a Shari'a compliant bank it complies with Shari'a principles in all transactions and products provided to its clients, whether such products are investment deposits, Islamic investment Sukuk or savings accounts as well as meeting client's various financing needs by providing options such as Murabaha (Cost-plus), Musharka (Joint Venture), Ijarah (Leasing) and cash back cards. It also offers Islamic options for letter of guarantee and letter of credit. The Bank has a Shari'a Board composed of Islamic jurists who are continually consulted regarding all aspects of new existing and banking transactions.

On April 3rd, 2013 the Bank's name was changed in the commercial register from the National Bank for Development" to "Abu Dhabi Islamic Bank - Egypt".

The bank provides a full range of banking services to corporate, retail and micro finance clients in Egypt and the head office is located in Cairo, 9 Rostom st, Garden City. Through 68 branches across all governorates and are served by 2,289 employees at 31 December 2017

The separate financial statements for the Year ended 31 December 2017 were approved by the bank's Board of Directors on 20 February 2018.

2- Summary of significant accounting policies

Below are the significant of accounting policies applicable for the preparation of the separate financial statements;

A) Basis of preparation of the separate financial statements

The separate financial statements have been prepared in accordance with the Central Bank of Egypt (CBE) basis of preparation of the Bank's financial statements and principles of recognition and measurement as approved by its Board of Directors on 16th December 2008. These separate financial statements have been prepared under the historical cost convention as modified by the revaluation of trading financial investment, available for sale investment.

There separate financial statements have been prepared in accordance with the requirements of related applicable Egyptian laws and regulations. The bank has also prepared consolidated financial statements for the bank and its subsidiaries in accordance with the central bank of Egypt (CBE) basis of preparation issued on 16th December 2008 and according to EAS, which are companies in which the bank owns directly or indirectly more than half of the voting rights, or has the ability to control the financial and operational policies regardless of the type of activity.

Consolidated and separate financial statements are to be read together as of 31 December 2017 to gather sufficient information to understand the banks' activities, results, cash flows and change in equity.

Notes to Separate Financial Statements as of 31 December 2017– Continued

B) Associates and Subsidiary Companies

B/1 Subsidiaries

Subsidiaries are entities which the bank has the power to govern its financial and operating policies either directly or indirectly. Usually the bank's ownership exceeds half the voting power taking into consideration potential future voting power where the bank has the option to exercise or convert that option at the time of assessment.

B/2 Associates

Associates are companies where the bank owns (from 20% to 50%) either directly or indirectly enough shares to influence the financial and operating policies of the company whilst not reaching control.

The purchase method is used to account for the acquisition of subsidiaries and associates by the Bank. The cost of an acquisition is measured at the fair value or/and asset given or/and equity instruments issued or/and liabilities assumed at the date of exchange plus costs directly attributable to the acquisition. Net assets including contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the minority Profit. The excess of acquisition cost over the Banks' share of the fair value in the net assets acquired is recorded as goodwill. If the acquisition cost is less than the fair value of the net assets, the difference is recognized directly in the income statement under the item "Other operating income/(expenses)".

Associates and subsidiaries in the financial statements are accounted for using the cost basis, investments are recognized by the acquisition expenses basis, deducting any impairment loss in value and dividend income is recognized in the income statement when it is declared, and the bank's right to receive payments is established.

C) Segment Reports

A business segment is a group of assets and operations engaged in producing products and services which have similar risks and benefits; each sector is distinct from the other. Geographical sectors are related within an economic environment each with distinct characteristics.

The bank does not have any geographical sectors that operate in a different economic environment as at 31 December 2017.

Notes to Separate Financial Statements as of 31 December 2017– Continued

D) Foreign Currency Transactions

D/1 Trade and presentation currency

The Egyptian pound is the currency of preparation and presentation of the financial statements.

D/2 Transactions and balances in foreign currency

The Banks' accounting records are maintained in Egyptian pounds whilst transactions in other currencies are recorded at rates of exchange ruling on the transaction date. Monetary assets and the liabilities in foreign currencies are revalued into Egyptian pounds at the rates of exchange ruling at the balance sheet date with any resultant gain or loss being recorded in the income statement as follows:

- Net trading income or net income from financial instruments originally classified as a change in fair value through Income Statement according to its type.
- Other operating income/loss for other items.

The changes in fair value of monetary financial instruments denominated in foreign currencies and classified as available for sale (debt instruments) are classified into:

- Differences due to change in amortized cost of the instrument; these are recognized through Income Statement in Income from Murabha, Musharka, Mudarba and similar income.
- Differences due to changes in foreign currencies exchange rates; these are recognized through Income Statement in "Other operating income /expense"
- Differences due to change in fair value of the instrument which are recognized through equity in "Available for sale fair value reserve".

Translation differences on non-monetary items such as equity securities held at fair value though profit or loss are reported as part of the fair value gain or loss translation difference on non-monetary items such as available for sale the income is recorded directly in equity within "Net unrealized gains and losses on available for sale assets" .

E) Financial assets

The Bank classifies its financial assets into the following groups:

- Financial assets designated at fair value through Income Statement.
- Financings and receivables.
- Financial investments held to maturity.
- Financial investments available for sale.

The management's classification depends on the purpose of the investments at the time of its purchase.

Notes to Separate Financial Statements as of 31 December 2017– Continued

F-1 Financial assets designated at fair value through Income Statement

Financial assets include investments Held for Trading:

- Financial instrument are recorded as held for trading if they are acquired for resale in the short term, or if they represent part of a specific financial instrument or portfolio that are managed together and there is an evidence of actual recent transactions which refers to gains\losses of income in the short term.
- Under all circumstances the bank does not re-classify any financial instrument into financial instruments measured at fair value through income statement or to a group of financial assets held for trading.

F-2 Financings and receivables

Financings and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those:

- That the bank intends to sell immediately or in the short term, which are classified as held for trading, or are classified as financial assets designated at fair value through the income statement account.
- That the bank upon initial recognition designates the asset as available for sale.
- For which the bank may not recover substantially all of its initial investment other than because of a credit deterioration of the issuer.
- Financing to Customers are measured by fair value on initial recognition which includes all transaction costs, fees and commissions and payments to agents, brokers and suppliers.
- Historical probability of default for the retail portfolio was calculated according to the realized loss for the past 3 to 6 months and based on average delinquency period for each product. For corporate portfolio, Historical probability of default was calculated as per the rates issued by Moody's for the Middle East for each facility as per its facility risk rating.

F-3 Investments held to maturity

Held to maturity financial investments are non-derivative assets which carry fixed or determinable payments and where the bank has the intention and the ability to hold to maturity. All held to maturity financial investments are reclassified as available for sale in case of a sale of significant portion unless the sale is in an emergency situation.

F-4 Financial investments available for sale

Available for sale financial investments are non-derivatives financial assets that are intended to be held for unspecified period and may be sold to provide liquidity or due to changes in the prices of shares, foreign currencies, or Profit rate.

Notes to Separate Financial Statements as of 31 December 2017– Continued

The following principles are followed for the financial assets

Purchases or sales of financial assets designated at fair value through profit and loss, held to maturity financial investments, and available for sale financial investments are recognized at the trade date which is the date the bank is committed to purchase or sell the financial asset.

Financial assets that are not classified as designated at fair value through profit and loss at initial measurement are recognize at fair value plus directly attributable costs of acquisition or issue while financial assets designated at fair value through profit and loss at initial measurement are recognized only at fair value, any directly attributable acquisition or issue costs are recorded in the "net trading income" in the income statement.

Financial assets are de-recognized where the rights to receive cash flows from the asset have expired or the bank has transferred all the risks and rewards of the asset to another party, while a financial liability is derecognized when the obligation under the liability is discharged or cancelled or expired.

Available for sale financial investments and financial assets designated at fair value through profit and loss are subsequently measured at fair value.

Held to maturity financial investments are subsequently measured at amortized cost.

Profit and loss due to changes in fair value of financial assets designated at fair value through profit and loss are recorded in income statement during the period it occurred.

Profit and losses arising from changes in fair value of available for sale financial investments are recognized directly in equity, when the asset is disposed of or impaired, the cumulative profit or loss previously recognized in equity is recognized in the income statement.

Monetary assets' profit income is recognized based on the amortized cost method in the income statement. The foreign currency revaluation differences related to available for sale investments are recognized in the income statement. Available for sale equity instruments related to dividends are recognized in the income statement when they are declared.

Fair values are obtained from quoted market prices in liquid markets. Where no active market exists, or quoted prices are unobtainable the fair value is estimated using a variety of valuation techniques, including discounted cash flow and other pricing models. Inputs to pricing models are generally market-based where available and taken from reliable external data sources.

If the range of reasonable fair value estimates is significant and the probabilities of the various estimates cannot be reasonably assessed, an entity can measure the equity instrument at cost minus any impairment losses.

Profit calculated using the effective profit method and foreign currency gains and losses on monetary assets classified as available for sale are recognized in the income statement, Dividends on available for sale equity instruments are recognized in the income statement when the entities right to receive payment is established.

The fair values of quoted investments in active markets are based on current bid prices, If there is no active market for a financial asset, the bank measures the equity instruments that are classified as available for sale at cost net of impairment loss, if any.

Notes to Separate Financial Statements as of 31 December 2017– Continued

The Bank reclassifies the financial asset previously classified as available for sale to which the definition of loans-debts (bonds or loans) applies by means of transferring the category of the instruments available for sale to the category of loans and debts or the financial assets held to maturity, once the Bank has the intention and ability to hold such financial assets in the near future or up to the maturity date, such reclassification is made at fair value as on that date. Any profits or losses related to such assets which have been previously recognized within equity shall be treated as follows:

- Financial assets with fixed or determinable payments and fixed maturity is valued at amortized cost, using the effective Profit method in case of impairment the profit and loss that have been previously recognized directly in equity is removed from equity and recognized in the income statement.
- Profit and loss related to financial assets without fixed or determinable maturity are held in equity till sale or disposal of the asset then removed from equity and recognized in the income statement, In case of impairment the profits and losses that have been previously recognized directly in equity are removed from equity and recognized in the income statement.

If the Bank changes its estimates regarding payments or proceeds, the book value of a financial asset (or group of financial assets) has to be adjusted to reflect the actual cash inflows and the change in this estimate through calculating the present value of estimated future cash flows using the effective Profit rate for the financial instrument. This adjustment is recognized as either income or expense in the income statement.

In all cases, if the Bank reclassified financial asset in accordance with what is referred to above and the Bank subsequently increase its future cash proceeds estimates resulted from an increase in the recoverable amount from its cash receipts, this increase is recognized as an adjustment to the effective Profit rate not as an adjustment in the book value of the asset at the date of change in estimate.

G) Offset of financial assets and financial liabilities

Financial assets and liabilities are offset when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously. REPO and reverse REPO agreements are netted in balance sheet under treasury bills.

H) Profit income and expenses

Profit income and expense for all profit-bearing financial instruments, except for those classified as held for trading or designated as at fair value through profit or loss, are recognized within 'profit income' and 'profit expense' in the income statement using the effective Profit rate method, The effective profit/Profit rate method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the profit income or profit expense over the relevant period.

The effective profit rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective profit rate, the bank estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options), but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective profit rate, transaction costs and all other premiums or discounts. Profit income on financings is recognized on accrual basis except for the Profit income on non-performing financings, which ceases to be recognized as revenue when the recovery of Profit or principle is in doubt.

Notes to Separate Financial Statements as of 31 December 2017– Continued

When financings or debts are classified as non-performing or impaired, related profit income are not recognized but rather, are carried off balance sheet in statistical records and are recognized as revenues on the cash basis as follows:

- When collected and after recovery of all areas for retail financings, personal financings, real estate financings for personal housing and financings to small business.
- For corporate financings, profit income is also recognized on the cash basis, according to which Profit earned during the periods subsequent to reschedule agreements does not start to accrete on the financing principal until the bank collects 25% of the rescheduled installments and after payments of the installments continue to be regular for at least one year, Profit income will not be recognized as revenue until full payment of the loan balance before the rescheduling and client is considered to be performing.

I) Fees and Commission Income

Accrued fees for loans or advances service are recognized as revenue at the time service is provided. Fees and commissions income related to non-performing or impaired loans or debts are suspended and are carried off-balance sheet and are recognized under income according to the cash basis, when Profit income is recognized.

Fees that represent a complementary part of the actual Profit on the financial asset in general and treated as adjustment to the actual Profit rate.

I/1 Commitment fees on loans granted are deferred if there is a possibility that such loans shall be drawn, since the commitment fees received by the Bank are deemed to be a compensation for the ongoing intervention to acquire the financial instrument; subsequently, they are recognized by adjusting the effective Profit rate on the loan. In the event of expiry of the commitment year without issuing the loan by the Bank, the fees are recognized as revenues at the expiry of the commitment Year.

I/2 Fees related to debt instruments which are measured at fair value are recognized under revenue at initial recognition. The fees for promotion of syndication loans are recognized as revenues upon completing the promotion process without retaining any part of the loan by the Bank, or if the Bank maintains a part thereof with the actual Profit rate available to other participants.

I/3 Commissions and fees arising from negotiation, or participating in a negotiation in favour of a third party as in share acquisition arrangements or purchase of securities or purchase or sale of businesses are recognized in the consolidated income statement when the transaction is completed.

I/4 Management advisory and other service fees are recognized as income on a time proportionate basis over the life time of the service.

Notes to Separate Financial Statements as of 31 December 2017– Continued

J) Dividends Income

Dividends are recognized in the income statement when the right to receive dividends is established.

K) REPO and Reverse Repo agreements

Financial instruments sold in accordance to re-purchase agreements are recognized as assets added to the balance of treasury bills on the balance sheet. Liabilities under purchase and re-sale agreements are deducted from the balance of treasury bills and the difference between sale price and re-purchase price is recognized as accrued income over the term of the agreement using effective Profit method.

L) Impairments of financial assets

L-1 Financial assets at amortized cost

At each balance sheet date, the bank assesses whether there is an objective evidence that any financial asset or group of financial assets is impaired .These financial asset or group of financial assets is considered to be impaired if there is an objective evidence as a result of one or more events that occurred after its initial recognition of the asset (loss event), and this loss event has an impact on the estimated future cash flow of financial asset or group of financial assets that can be reliably estimated.

The indicators used by the bank to determine that there is an objective evidence of impairment losses includes any of the following:

- Significant financial difficulties facing the client.
- Violation to the terms of financing agreement, such as non-payment.
- Expecting customer bankruptcy or entering into lawsuit liquidation or re-structuring of the facilities and financing granted to him.
- The deterioration of the competitive position of the client.
- The bank may not approve granting the client privileges or concessions in normal circumstances due to the existence of financial difficulties of the customer due to economic or legal reasons.
- The impairment of the collateral value.
- The deterioration of the credit worthiness.

A substantive evidence for impairment loss of group of financial assets that shows the existence of clear information indicating a measurable decline in the expected future cash flows of such category since initial recognition including such that cannot be separately determined for each individual asset such as increase of default cases with respect to a banking product.

The bank estimates the period between the date on which the loss event has occurred and the date on which the impairment loss has been identified for each specific portfolio. For application purposes, the bank considers this period from 3 months to one year.

Notes to Separate Financial Statements as of 31 December 2017– Continued

The bank first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. Taking into consideration the following:

- If the bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment based on the historical loss rates.
- The bank determines that there is an objective evidence that impairment exist, assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

Impairment loss is calculated by the difference between the carrying amount and the present value of estimated future recorded cash flow, excluding future expected credit losses not changed yet, discounted at the financial assets' original effective Profit rate. This impairment is booked in the income statement as "Impairment loss" and the book value of the financial asset is reduced by the impairment amount using "Impairment loss provision".

If there is objective evidence that an impairment loss on financings and receivables or held-to-maturity investments carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the assets' carrying amount and the present value of estimated future cash discounted at the financial asset's original effective Profit rate. The carrying amount of the asset shall be reduced through use of an allowance account. The amount of the loss shall be recognized in profit or loss.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (asset nature, business nature, geographical location, type of collateral, delay position etc.) that are indicative of the debtors' ability to pay all amounts due according to the contractual terms. Provisions are then related to estimate future payments as an indication of the borrowers' ability to fulfill his contract.

When assessing the impairment loss for a group of financial assets on the basis of the historical loss rates, future cash flows in the group are estimated on the basis of the contractual cash flows of the Bank's assets and the historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently.

The bank ensures that estimates of changes in future cash flow reflect the changes in related observable data from period to period For example, changes in unemployment rates, property price, the position of settlement and any other factors that indicate changes in the probable loss of the group or probable loss in its value. The methodology and assumptions used for estimating future cash flows are reviewed periodically by the bank to estimate the future cash flow.

Notes to Separate Financial Statements as of 31 December 2017– Continued

L-2 Financial investments available for sale and held to maturity date in associates and subsidiary companies

At each balance sheet date, the bank assesses whether there is objective evidence that any financial asset or group of financial assets, that are classified as available for sale has been impaired. In case there is a significant or prolonged decline in the fair value of an investment in an equity instrument below its cost is an objective evidence of impairment. Such decline is presumed to be significant for the equity instruments if it reaches 10% of the cost of the financial instrument, whereas it is presumed a prolonged decline when it extends for a period of more than 9 months.

In respect of available for sale equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized directly in equity. However, if in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss shall be reversed, with the amount of the reversal recognized in profit or loss for that debt instrument.

M) Intangible Assets

Software (computer programs)

Expenditure on the upgrade and maintenance of computer programs is recognized as an expense in the income statement in the period in which it is incurred. Expenditures directly incurred in connection with specific software are recognized as intangible assets if they are controlled by the bank and when it is probable that they will generate future economic benefits that exceed its' cost within more than one year. Direct costs include the cost of the staff involved in upgrading the software in addition to a reasonable portion of relative overheads.

Upgrade costs are recognized and added to the original cost of the software, when it is likely that such costs will increase the efficiency or enhance the performance of the computers software beyond their original specification.

Cost of the computer software recognized as an asset shall be amortized over the period of expected benefits which shall not exceed three years.

N) Fixed Assets

Lands and buildings comprise the head office premises and branches. All fixed assets are carried at historical cost net of accumulated depreciation and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the fixed assets.

Subsequent costs are included in the assets carrying amount or recognized separately, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the bank and the cost of the item can be measured reliably. Repairs and maintenance expenses are recognized in profit or loss within "other operating costs" line item during the financial period in which they are incurred.

Notes to Separate Financial Statements as of 31 December 2017– Continued

Depreciation is charged so as on all assets, other than land so as to write off the cost of assets over their estimated useful lives, using the straight-line method to the extent of their estimated residual values based on the following annual rates:

Item	Life time
Buildings	20 years
Decorations and preparations	20 years
Integrated systems & equipment	5 years
Motor vehicles	5 years
Furniture and fittings	10 years
Other equipment	8 years

The residual value and useful life of the fixed assets is reviewed on every balance sheet date and adjusted whenever it's necessary.

The bank reviews the carrying amounts of its depreciable fixed assets whenever changes in circumstances or events indicate that the carrying amounts of those assets may not be recovered. Where the carrying amount of an asset exceeds its recoverable amount, the carrying amount is reduced to its recoverable amount.

The recoverable amount of an asset is the higher of the asset's net realizable value or value in use, gains and losses on disposals are determined by comparing proceeds with relevant carrying amount, these are included in profit or loss in other operating income/(expenses) in the income statement.

O) Impairment of non-financial assets:

Non-financial assets that do not have definite useful lives, except for goodwill, shall not be amortized. These are annually tested for impairment. Depreciable fixed assets are tested for impairment whenever changes in circumstances or events indicate that the carrying amounts of those assets may not be recovered.

Impairment loss is recognized and the carrying amount of an asset is reduced to the extent that such carrying amount exceeds the asset's recoverable amount. For the purpose of estimating the impairment loss, where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs. At each balance sheet date, non-financial assets for which an impairment loss is recognized shall be reviewed to assess whether or not such impairment losses should be reversed through profit or loss.

P) Leasing

This is calculated as per law no. 95 for the year 1995, about finance leasing in case the contract grants the right to the tenant to purchase the asset by a set date and a set value, in addition to contract life covers more than 75% of estimated useful life, or if the fair value of total rental payments represent payments more than 90% of the assets value. Other contracts represent operational rent contracts.

P-1 Rent

For leasing contracts the expense of rent in addition to maintenance is recognized as expenses in the income statement in the period incurred. If the Bank exercises its right to purchase the rented asset, the expenses of purchase is capitalized and depreciated over the remaining useful life as the same way other assets are depreciated.

The payments are recognized under operational rent and decreased by the amount of any payments received within the stated period and registered in the income statement as steady installments.

Notes to Separate Financial Statements as of 31 December 2017– Continued

Q) Cash and cash equivalents

For the purposes of the cash flows statement, cash and cash equivalents comprise balances due within three months from date of acquisition; they include cash and balances due from central bank of Egypt, other than those within the mandatory reserve, current accounts with banks and treasury bills.

R) Other provisions

Provisions for restructuring costs and legal claims are recognized when the Bank has a present legal or constructive obligation as a result of past events; it is more likely than that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated.

Where there are a number of similar obligations, the likelihood that an outflow is required to settle an obligation is determine taking into consideration the group of obligations as a whole.

A provision is recognized even if the likelihood of an outflow with respect to any obligation in the group is minimal.

When a provision is wholly or partially no longer required, it is reversed through profit or loss under other operating income/ (expenses).

Provisions are measured at the present value of the expected required expenditures to settle obligations after one year from financial statement date using the appropriate rate in accordance with the terms of settlement ignoring the tax effect which reflects the time value of money. If the settlement term is less than one year the provision is booked using the present value unless time consideration has a significant effect.

S) Taxes

Taxes include income taxes and deferred taxes are recognized in the income statement except for income tax relating to the owners' equity which is recognized directly within the owners' equity statement.

The income tax recognized for current period tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period, in addition to income tax adjustments related to previous years.

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the separate financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered, However, when it is expected that the tax benefit will increase, the carrying amount of deferred tax assets shall increase to the extent of previous reduction.

Notes to Separate Financial Statements as of 31 December 2017– Continued

T) Employees Benefits

Employees saving insurance fund

In the first of July 2013 the bank established a private social insurance fund (Alsondoq) according to the law number 54 for the year 1975 "private insurance funds law and the regulations", The bank has registered the fund in 14 January of 2014 under number (884), the fund started on the first of April 2014, terms and modification of the fund is applied to the employees working in the head office of the bank and its branches in the Arab republic of Egypt.

The bank is committed to pay the subscriptions to the fund monthly calculated according to the rules of the fund and its modifications. Generally the fund is financed through the monthly subscriptions and some other resources specified in fund's list.

The insurance benefits will be paid when the member reaches end of service due to retirement or death or total or partial disability, In case the term of membership is less than 3 years, the member will receive his contribution balance paid by himself to the fund on the date of retirement or membership.

Legacy staff medical benefit plan

The Bank has a Defined Benefit Medicare Plan for its legacy employees during their service period and post retirement, the liabilities of this system represent in the present value of its liabilities minus its assets at the end of each period including the actuarial loss and revenues settlements and also the prior year cost. The liability determined by independent actuarial expert using the Projected Unit Credit method. the fair value of the liabilities are determined by the projected forecasted cash outflow using discount rate of governmental bonds with maturities similar the maturity of liability. The liability recorded in other liabilities.

The actuarial revenues or losses arising from change in actuarial assumptions and amendments in the medical plan are hitting the income statement.

U) Comparative figures

Comparative figures are reclassified, where necessary, for consistency with changes in the current year's presentation.

3- Financial risks management

The bank, as a result of conducting its activities, is exposed to various financial risks. Since financial activities are based on the concept of accepting risks and analyzing and managing individual risks or group of risks together, the bank aims at achieving a well-balanced risks and relevant rewards, as appropriate and to reduce the probable adverse effects on the bank's financial performance. The most important types of risks are credit risk, market risk, liquidity risk and other operating risks. The market risk comprises foreign currency risk, Profit rate risk and other pricing risks.

The risk management policies have been laid down to determine and analyze the risks, set limits to the risk and control them through reliable methods and up-to-date systems. The bank regularly reviews the risk management policies and systems and amendments thereto, so that they reflect the changes in markets, products and services and the best up-to-date applications.

Notes to Separate Financial Statements as of 31 December 2017– Continued

Risks are managed in accordance with preapproved policies by the board of directors; the risk management department identifies, evaluates and covers financial risks, in close collaboration with the bank's various operating units.

The board of directors provides written rules which cover certain risk areas, such as credit risk, foreign exchange risk, Profit rate risk and the use of derivative and non-derivative financial instruments.

3/1 Credit risk

Credit risk is the risk that one party will fail to discharge an obligation and will cause the other party to incur a financial loss. The bank deems financings to customers, banks and financial investments in terms of bills, current accounts, deposits at banks, as financial assets exposed to credit risk of settling part or all of the dues by the concerned parties on the maturity date. Credit risk also exists on items not registered in the balance sheet such as financing commitments. Management processes and credit risk controls are the main concern of the credit risk management team in Risk Department, who reports to the Board of Directors, senior management and heads of each business unit.

3/1/1 Measurement of Credit Risk

Financings and facilities to clients

To evaluate credit risk relating to financings and facilities to banks and/or clients the following 3 components are to be considered:

- Probability of default – by the client or counter party on its contractual obligations.
- Exposure at default – current exposure to the counter party and its likely future developments from which the Bank derive the exposure at default.
- Loss given default

The banks daily activities include measurement of credit risk, which reflects estimated loss (expected loss model) required by Basel banking observatory committee, a conflict could generate between operational measurements and impairments as per the Egyptian Accounting Standards (no 26), which recognizes losses encountered on balance sheet (Recognized losses) rather than "Expected loss" (note 3/1/3).

The bank evaluates each client through a detailed weight categorization; these methods have been developed for internal evaluation usage and for analysis to reach the appropriate weighting. The banks' clients have been categorized to 4 categories, reflecting the delay in payment, therefore clients could move between the various categories depending on evolving circumstances. The bank frequently and periodically reviews the efficiency of this method to estimate any delay cases.

Notes to Separate Financial Statements as of 31 December 2017– Continued

Internal Categories

<u>Category</u>	<u>Description</u>
1	Good debts
2	Regular follow up
3	Special follow up
4	Bad debts

Exposure at default is based on the amounts the bank expects to be outstanding at the time of default.

The estimated loss, is the loss incurred when delay in payment occurs, being a percentage of financing which differs depending upon client, nature of claim, available collaterals and guarantees.

Debt Instruments and treasury bills

The bank, in this case uses external categorization, such as standard and poor or other equivalents. If external classification is not available, the method of credit risk is followed. The investment in those securities and bills are viewed as a way to gain a better credit quality mapping and maintain a readily available source to meet the funding requirements at the same time.

3/1/2 Minimization and avoidance of risk:

The Bank manages limits and controls concentration of credit risk wherever they are identified – in particular, to individual counterparties and banks, and to industries and countries. The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical and industrial segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review, when considered necessary. Limits on the level of credit risk by individual, counterparties, product, and industrial sector and by country are approved quarterly by the board of directors.

The exposure to any one borrower including banks is further restricted by subsidiary limits covering on- and off-balance sheet exposures, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored daily.

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate. Some other specific control and mitigation measures are outlined below:

Notes to Separate Financial Statements as of 31 December 2017– Continued

Collaterals

Several rules and policies are stated by the bank to minimize credit risk, one of which is collaterals, the bank specifies guidelines for certain types of collaterals. Major types are as follows:

- Real estate mortgage
- Operating asset mortgage such as machinery and goods
- Mortgage of financial instruments such as: securities or equities

Usually the long term facilities and corporate are with collaterals, while credit for retail are without collaterals to minimize any losses to minimal, The bank seeks extra collaterals from related parties if a sign of impairment of any financing or facility occurs.

Collaterals are taken as a guarantee for other assets except for financial and facilities and usually, treasury bills and securities are with no collaterals, except for financial pools covered by asset-backed securities and similar guaranteed by financial instruments.

Commitments related to credits

The major need for commitments related to credits is for the client to have liquidity when needed.

Guarantees and standby letters of credit issued by the bank on behalf of the client; to grantee a third party the right to withdrawal from the clients account within a certain limit.

Usually this is guaranteed by shipped merchandise or goods therefore the risk weight is less than direct financings.

Credit commitments represent the hidden unused part of the risk tolerated by the bank such as granting financings, LCs and LGs, the Bank then is subject to losses to equal value of credits. Losses indorsed by unused credits are less than the value, due to facilities being granted for possible commitments for a specific client with certain conditions, The Bank observes the credits till maturity date (long term credits hold a higher risk weight).

Notes to Separate Financial Statements as of 31 December 2017– Continued

3/1/3 Impairment & Provisioning Policies

Internal rating system mentioned earlier (Note 3/1/1) focuses more on planning the quality of credit process and this in the beginning of investing and financing activities, other than that. Impairment losses is recognized only on the balance sheet date for financial reporting purposes according to the objective evidence of impairment as per noted in this disclosure and due to the difference in methodologies applied, usually impairment losses that is reported as per Central bank of Egypt laws and regulations using the estimated losses model is higher than those charged to the financial statements (note 3/1/4).

Impairment loss provisions stated on the end of year balance sheet are extracted from the categorized weight risk rating. Provisions are mainly calculated for credits holding the lowest category. The following table clarifies the percentage upon which the provisions are calculated as of 31 December 2017 related financing and facilities and impairment loss provision related to the internal bank rating:

Banks Rating	31 December 2017		31 December 2016	
	Financings and Facilities	Impairment loss provisions	Financings and facilities	Impairment loss provisions
Good debts	78%	31%	78%	38%
Regular follow up	15%	8%	16%	10%
Special follow up	2%	5%	1%	1%
Bad debts	5%	56%	5%	51%
	100%	100%	100%	100%

Internal evaluation helps to clarify if there are any significant indications existing for provisions, as per Egyptian Accounting Standards no. 26. Guided by the following points set by the bank:

- Financial problems faced by the client.
- Breaching of financing contract for example overdue installments.
- Prediction of bankruptcy or liquidation or financial restructure.
- Deterioration of competitive position.
- The Bank granting superior or extraordinary facilities that the bank could normally not agree upon.
- Impairment of the collateral.
- Deterioration of credit status

The bank's policy includes revising all the bank's assets (exceeding a certain percentage of importance) at least once per year or more if needed.

Loss is evaluated at the balance sheet date on all major accounts. Evaluation normally includes the existing collateral, verifying all payments and withdrawals expected from the account.

Impairment loss provision is charged on similar group of assets using historical expertise available, personal judgment and statistical methods.

Notes to Separate Financial Statements as of 31 December 2017– Continued

3/1/4 Model of General Risk Measurement

In addition to the 4 categories stated in note 3/1/1, the management takes on several other detailed measurements, to comply with the CBE requirements. Assets exposed to risk are categorized as per the CBE's conditions and instructions, mainly related to the client, such as: activity, financial position, payment stability.

The bank calculates the impairment of assets exposed to credit risk, including commitments relating to credit on the basis of rates determined by CBE. In case, the required for impairment losses as per CBE credit worthiness rules on 16 December 2008, exceeds the provisions, that excess shall be debited to retained earnings and carried to the general reserve for banking risks in the equity section.

Such reserve is always adjusted on a regular basis, by any increase or decrease so that the reserve shall always be equivalent to the amount of increase between the two provisions. Such reserve is not available for distribution (note 30/3) and shows the movement on the general reserve for banking risks during the financial period.

As follows is the statement of credit rating for corporations as per the Bank's internal ratings as compared with those of CBE's; it also includes the percentages of provisions required for impairment of assets exposed to credit risk.

CBE rating	CBE rating Description	Required Provision %	Internal Rating	Internal Rating Description
1	Low risk	0%	1	Good debts
2	Moderate risk	1%	1	Good debts
3	Satisfactory risk	1%	1	Good debts
4	Appropriate risk	2%	1	Good debts
5	Acceptable risk	2%	1	Good debts
6	Marginally acceptable risk	3%	2	Normal watch list
7	Watch list	5%	3	Special watch list
8	Substandard	20%	4	Non-performing financing
9	Doubtful debts	50%	4	Non-performing financing
10	Bad debts	100%	4	Non-performing financing

Notes to Separate Financial Statements as of 31 December 2017– Continued

3/1/5 Maximum limit for credit risk before guarantees

(All amounts are in thousand Egyptian pounds)

	31 December 2017 LE 000's	31 December 2016 LE 000's
Balance sheet items exposed to credit risks		
Treasury bills	8,257,550	4,906,726
Financing to customers and banks		
Financing to banks	305,018	-
Retail loans		
- Overdraft	3,012	2,407
- Covered cards	2,267,484	2,164,880
- Personal financing	6,512,773	4,728,914
- Real estate mortgage	40	49
Corporate loans:		
- Overdraft	2,372,060	1,876,783
- Direct financing	9,370,277	9,807,672
- Syndicated financing	760,794	879,851
Financial investments:		
-Debt instruments	6,842,812	5,707,117
Total	36,691,820	30,074,399
Off balance sheet items exposed to credit risks		
Letters of credit (import & confirmed export)	1,015,314	265,785
Letters of guarantee	1,363,652	917,694
Documentary credit	291,083	147,062
Bank guarantees	1,013,447	888,511
Total (note 32/2)	3,683,496	2,219,052

The above table represents the maximum limit of risk to be exposed to at the end of 31 December 2017 and without taking into consideration any guarantees, for balance sheet items, amounts stated depends on the net carrying amount shown in the balance sheet.

As shown in the preceding table 58.01 % (31 December 2016: 64.71%) of the maximum limit exposed to credit risk results from financings and facilities to customers, while investments in debt instruments represents 18.65% (31 December 2016: 18.98%).

The management is confident in its ability to maintain control on an ongoing basis and maintain the minimum credit risk resulting from financing portfolio, facilities, and debt instruments as follows:

- 93.40 % (31 December 2016: 94.45%) of the financings and facilities portfolio are rated on the highest 2 levels of the internal rating.
- 78.19 % (31 December 2016: 78.35 %) of the financing portfolio and facilities having no arrears or indicators of impairment.

Notes to Separate Financial Statements as of 31 December 2017– Continued

3/1/5 Maximum limit for credit risk before guarantees – Continued

- Financings and facilities valued on a separate basis amounting to LE 969mn (31 December 2016: LE 920mn) with impairment less than 4.65% from its value against (31 December 2016: 4.73 %).
- The bank applied more prudential selection process on granting financings and facilities during the financial Year ended 31 December 2017
- 100 % of investments in debt instruments and treasury bills represent debt instruments due from the Egyptian government.

3/1/6 Financing and facilities to customers:

Re-structured financing

Restructuring activities include renegotiating, extending payment terms, applying mandatory management policies, and adjusting/postpone repayment terms. Renegotiating policies depend on indicators or standards in addition to the management personal judgment to show that regular payments are of high probability. These policies are subject to regular review. Long-term financings, especially financings to customers are usually subject to renegotiation.

3/2 Market Risk

The bank exposed to market risks which is the risk that the fair value or future cash flow fluctuation resulted from changes in market prices. Market risks arise from open market related to Profit rate, currency, and equity products of which each is exposed to general and specific market movements and changes in sensitivity levels of market rates or prices such as Profit rates, foreign exchange rates and equity instrument prices. The Bank divides its exposure to market risk into trading and non-trading portfolios.

Bank treasury is responsible for managing the market risks arising from trading and non-trading activities of which monitored by two separate teams. Regular reports about market risk are submitted to the Board of Directors and each business unit head periodically.

Trading portfolios include transactions where the Bank deals direct with clients or with the market; Non-trading portfolios primarily arise from managing assets and liabilities Profit rate price relating to retail transactions. Non-trading portfolios also includes foreign exchange risk and equity instruments risks arising from the Bank's held-to-maturity and available-for-sale investments portfolios.

3/2/1 Market Risk Measurement techniques

The following are the major measurement techniques used to manage the market risk:

▪ Value at risk

The Bank applies a 'value at risk' methodology (VAR) for trading and non-trading portfolios to estimate the market risk of positions held and the maximum expected losses based on a number of assumptions for various changes in market conditions. The ALCO committee sets separate limits for the value of risk that may be accepted by the Bank for trading and non-trading portfolios and monitored by the market risk department.

VAR is a statistical estimation of the expected losses on the current portfolio from adverse market movements in which it represents the 'maximum' amount the Bank expect to lose using confidence level (99%). Therefore there is statistical probability of (1%) that actual losses could be greater than the VAR estimation.

The Bank's assessment of past movements is based on data for the past three years. The Bank applies these historical changes in rates prices indicators....etc. directly to its current positions this approach called historical simulation. Actual outcomes are monitored regularly to test the validity of the assumptions and factors used in the VAR calculation.

The use of this approach does not prevent losses from exceeding these limits if there are significant market movements.

As VAR considered a primary part of the Bank's market risk control technique VAR limits are established by the ALCO Committee periodically for all trading and non-trading transactions and allocated to business units. Actual values exposed to market risk are compared to the limits established by the bank and reviewed daily by the market risk department.

The quality of the VAR model is continuously monitored through examining the VAR results for trading portfolio and results are reported to the ALCO Committee.

Notes to Separate Financial Statements as of 31 December 2017 – Continued

▪ Stress Testing

Stress testing provides an indicator of the expected losses that may arise from sharp adverse circumstances. Stress testing are designed to match business using standard analysis for specific scenarios. The stress testing carried out by the Bank treasury. Stress testing include: risk factor stress testing where sharp movements are applied to each risk category and test emerging market stress, as emerging market portfolios are subject to sharp movements; and subject to special stress including possible stress events to specific positions or regions - for example the stress outcome to a region applying a free currency rate. The results of the stress testing are reviewed by top management and Board of directors

3/2/2 VAR summary

	31 December 2017			31 December 2016		
	Average	High	Low	Average	More	Less
Foreign Currency risk	17,158	38,547	628	36,074	-	-
Profit rate risk	14,738	18,667	8,126	8,021	-	-
Total value upon risk	31,896	57,214	8,754	44,095	-	-

Total value at risk for Trading portfolio per Risk category:

	31 December 2017			31 December 2016		
	Average	High	Low	Average	More	Less
Foreign Currency risk	17,158	38,547	628	36,074	-	-
Profit rate risk	642	1,965	10	-	-	-
Total value upon risk	17,800	40,512	638	36,074	-	-

Total value at risk for Non Trading portfolio per Risk category:

	31 December 2017			31 December 2016		
	Average	High	Low	Average	High	Low
Profit rate risk	14,096	16,702	8,117	8,021	-	-
Total value upon risk	14,096	16,702	8,117	8,021	-	-

The increase in VAR especially the Profit rate risk mainly proportion to the increase in market Profit rates volatility in the global financial markets.

The above three VAR results are calculated independently from the underlying positions and historical market movements. The aggregate of the trading and non-trading VAR results does not represent the bank's VAR due to correlations of risk types and portfolio types and their effect.

3/2/4 Profit rate risk

The Bank is exposed to Profit rate risk which is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market Profit rates. Fair value Profit rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market Profit rates. The Bank is exposed to the effect of fluctuations in the prevailing levels of market Profit rates on both its fair value and cash flow risks. Profit margins may increase as a result of such changes but may profit decrease in the event that unexpected movements arise. The Board of Director sets limits on the level of mismatch of Profit rate reprising that may be undertaken which is monitored daily by Bank risk department.

The following table summarize the extend that the bank is exposed to fluctuation in profit rate that includes the book value for the financial instruments distributed on re-pricing dates or maturity date which is closest;

31 December 2017	Value in LE 000's					Total

3/3 Liquidity risk

Liquidity risk represents difficulty encountering the Bank in meeting its financial commitments when they fall due and replace funds when they are withdrawn. This may result in failure in fulfilling the Bank obligation to repay to the depositors and fulfilling lending commitments.

Banks liquidity management

The Bank's liquidity management process carried out by the Bank risk department includes:

- Daily funding managed by monitoring future cash flows to ensure that all requirements can be met when due. This includes availability of liquidity as they due or to be borrowed to customers. To ensure that the Bank reaches its objective the Bank maintains an active presence in global money markets.
- The Bank maintains a portfolio of highly marketable and diverse assets that assumed to be easily liquidated in the event of an unforeseen interruption of cash flow.
- Monitoring liquidity ratios in relation with internal requirements and central bank of Egypt requirements.
- Managing financing and facilities concentration and dues.

For monitoring and reporting purposes, the Bank calculates the expected cash flow for the next day, week and month which are the main time Spain to manage liquidity the starting point to calculate these expectations is analyzing the financial liabilities dues and expected financial assets collections.

Its' role is also to monitor the liquidity gaps between average maturity assets and the level and type of unused financing commitments, the ratio of usage of debit current accounts, and the effect of contingent liabilities such as LCs and LGs.

Funding strategy:

Liquidity resources are reviewed through a separate team at the risk department to maintain wide diversification by currencies, geographical location, sources as well as maturities.

Assets available to meet all liabilities and cover financing commitments include cash, balances with the central bank, and balances due from banks, treasury bills and financings and facilities to banks and customers. Moreover, some financing and facilities to customers that are maturing during the year may be extended during the normal course of business of the bank. The bank has the ability to meet unexpected net cash flows through selling financial papers, and finding other financing sources.

Notes to Separate Financial Statements as of 31 December 2017 – Continued

3/4 Capital Management

The bank's objectives in managing its capital include elements in addition to equity shown in the balance sheet are represented in the following:

- Compliance with capital legal requirements in Egypt.
- Protecting the bank's ability to continue as a going concern and enabling it to generate yield for shareholders and other parties dealing with the bank.
- Maintaining a strong capital base to enhance growth.

Capital adequacy ratio and capital usage is reviewed on a daily basis in accordance with regulatory authority's requirements (CBE), through set models based on Basel II instructions; the required information is presented to the CBE on a quarterly basis.

The CBE regulations require compliance with the following:

- Maintaining LE 500mn as a minimum requirement for the authorized and issued capital.
- Maintaining a ratio between capital elements, asset and contingent liability elements weighted by risk weights at 10% or more.

The capital adequacy ratio consists of the following two tiers:

Tier 1

It is the basic capital comprising of paid up capital after deducting the carrying amount of the treasury stocks, retained earnings, reserves resulting from profit appropriations except the general banking risk reserve less any goodwill previously recognized and any carried forward losses.

Tier 2

Is the sub-ordinate capital comprising the equivalent of the general banking risk reserve in accordance with CBE credit rating deposits not more than 1.25 % of total assets and contingent liabilities (credit risk weights), subordinate deposits / financings maturing after more than 5 years (amortizing 20% of their value each year from the last 5 years of its life time), and 45 % of the increase between the fair value and carrying amount for the available for sale investments, investments held to maturity, and investments in affiliates and subsidiaries.

The numerator of capital adequacy ratio calculation has to consider:

Subordinated capital not exceed the basic capital.

Subordinated financing (deposits) not exceed half basic capital.

Assets are risk weighted in a range from 0% to 100 % according to the debit party for each asset, to reflect related credit risk taking into consideration cash guarantees; the same treatment is used for the off-balance sheet amounts after making relevant adjustments to reflect the contingent nature and the potential loss for these amounts.

The bank has complied with all the local capital requirements during the Year. Following is a table summarizing capital and capital adequacy ratio:

3/5 Leverage Financial Ratio

Central Bank of Egypt Board of Directors had approved in its meeting held on 7 July, 2015 special supervisory instructions related to leverage ratio which maintain a minimum level of leverage ratio of 3% to be reported on quarterly basis as following:

- Guidance ratio starting from reporting year ended December 2015 till year 2017.
- Obligatory ratio to start from year 2018.

This ratio will be included in Basel requirement tier 1 (minimum level of capital adequacy ratio) in order to maintain the Egyptian Banking System strong and safe, as long as to keep up with the best international regulatory treatments. Leverage financial ratio reflect relationship between tier 1 for capital that is used in capital adequacy ratio (After Exclusions) and other assets (on balance sheet and off-balance sheet) that are not risk weighted assets.

Ratio Elements

A-The numerator elements

The numerator consists of tier 1 for capital that is used in capital adequacy ratio (After Exclusions) in accordance with the requirements of the regulatory authority represented by the Central Bank of Egypt (CBE).

B-The denominator elements:

The denominator consists of all bank assets (on balance sheet and off-balance sheet) as per the financial statements "Bank exposure" which includes the total of the following:

- 1-On balance sheet exposure items after deducting some of tier 1 exclusions for capital base
- 2-Derivatives contracts exposures.
- 3-Financing financial notes operations exposures.
- 4-Off-balance sheet items (weighted by credit conversion factor)

4- Significant accounting estimates and assumption

The bank undertakes estimations and assumption that affect the value of assets and liabilities that has been disclosed during the next financial period, consistently estimations and judgments are based on historical experience and other factors, including the expectations that has that of future events that are reasonably estimated in accordance with the available information and circumstances.

4/1 Impairment loss for financings and facilities

The bank reviews the portfolio of financings and facilities on at least a quarterly basis. The bank uses discretionary judgment on determining whether it is necessary to record impairment in the income statement using reliable data indicating measurable decline in the expected future cash flows from financing portfolio before identifying any decline at the level of one financing. This evidence include data indicating negative change in the ability of a portfolio of borrowers to repay the bank, or local and economic circumstances related to default. On scheduling future cash flows, the management use estimates based on previous experience related to impairment of assets having credit risks. Such experience refers to impairment similar to that of the portfolio in question.

The methods and assumptions used in estimating both the amount and timing of the future cash flows are reviewed on a regular basis to minimize any discrepancy between the estimated loss and actual loss based on given experience.

4/2 Impairment loss of equity instruments available for sale

In the case of investment in available for sale equity instrument, a significant or prolonged decline in the fair value of the instrument below its cost the bank considers it as impairment. Where such evidence exists, significant or prolonged decline needs a personal judgment. To make this judgment the bank assesses, besides other factors, the common share price volatility. In addition, impairment exists when there is objective evidence that a certain company has a financial difficulty in its cash flow from operating and financing activities, industry tool or sector or technological advances.

4/3 Financial Investments Held to Maturity

Non-derivative financial assets with fixed or determinable payments and fixed maturity are classified as investments held to maturity. This category requires personal judgment and therefore the bank tests whether there is a genuine intent and ability to hold such investments to maturity. If the bank fails to hold such investments till maturity (except for certain tightly defined circumstance such as if an entity sells an insignificant amount of held to maturity investments close to maturity date), investments should be reclassified as available for sale, which will be measured at fair value instead of amortized cost.

	(58,953)	(46,596)

Notes to Separate Financial Statements as of 31 December 2017 – Continued

34-Employees benefits - Continued

34/1 Private insurance fund

At the first of July 2013, the bank established private insurance fund (the fund) according to Law No.54 for year 1975, the fund registered in EFSA on 14 January 2014 with No. (884), on 1 April 2014 the fund started its work. The employees in the head office and all branches are committed to the fund regulations.

The bank obligated to pay monthly contributions, in which, calculated according to fund regulation, generally the fund financed through monthly contributions in addition to other resources that detected in fund regulation.

The insurance benefits will be paid when the member reaches end of service due to retirement or death or total or partial disability, In case the term of membership is less than 3 years, the member will receive his contribution balance paid by himself to the fund on the date of retirement or membership.

EFSA has approved to start investing the monthly contributions accrued to employees and depositing the amount in the fund manager investment account.

34/2 Cost of early retirement to employees

Bank paid EGP 3,909 Mn till 31 December 2017 million EGP to the employees whom requested early retirement during the year.

34/3 Legacy staff medical benefit plan

The Bank has a Defined Benefit Medicare Plan for its legacy employees during their service period and post retirement, the bank hired independent actuarial expert to conduct the study and determine the necessary amount of the obligation to be recorded in financial statements using the projected unit credit method.

The main assumptions are used by the actuarial expert listed as follows:-

- Death rate from British table A49-ULT52
- Inflation rate 12%
- Discount rate 9.5%
- Using projected unit credit method in calculating liabilities

Notes to Separate Financial Statements as of 31 December 2017 – Continued

35- Tax position

Corporate Tax

- The Bank's corporate income tax position has been examined, paid and settled with the tax authority since the operations start up until the end of year 2012, pending disputed points are transferred to committees and the courts for adjudication.
- The bank's corporate income tax position under examination for the year 2013:2014 and for 2015 it has been providing the tax declaration for 2015 within the legal deadline.
- The Bank started from February 2012 on the basis of the opinion of the legal advisor and the tax advisor of the Bank to raise the case in front of the judicial courts to recover the value of the payment of the treasury bills/bonds taxes as the bank was incurring tax losses during the financial years of the dispute and the following which lead to stop paying these taxes and their penalties which is shown in other assets "due from tax authority", (Note 21). During the period, the Bank appealed to the Supreme Administrative Court against the ruling issued by the Administrative Court of First Instance rejecting the case to form a multiplicity of plaintiffs and filing another claim individually on 6 July 2017 to refund what paid of T-bills/Bonds taxes in excess of the tax payable amounts during the financial years in dispute, based on the same foundations already cited by the previous case, and saw both legal advisor and consultant tax of the Bank that the court ruling of this case will be in the favor of the bank.
- The Bank has charged the necessary provisions for tax on income of T-Bills/Bonds for the years which the bank incurs tax profits

Salary tax

- Tax inspections and internal committee for the years prior 2013/2014 has been finalized and no tax due for this year
- The Bank's salary tax is currently under examination for the year 2015/2016.
- The bank pays the payroll taxes on monthly basis on the due dates as stated by law.

Stamp duty tax

- Tax Inception and payment done till end 31 March 2013.
- Period from 1 April 2013 till 31 December 2015 still under inception.
- Year 2016, bank didn't receive any notes to start the inception.

Sales tax

- Inspection of the bank branches till 2015 has been finalized and all taxes due were paid.
- Years 2016/2017 still to inspect.

Real estate Tax

- The bank received claims for real estate tax for some branches and the bank objected on these claims in the legal deadlines, and we are following - up the objections in front of the appeal committees for these claims.

Notes to Separate Financial Statements as of 31 December 2017 – Continued

36 - Subsequent events:

The IASB issued IFRS 9 'Financial Instruments' in its final form in July 2014 and Central Bank of Egypt ("CBE") issued a circular on 28 January 2018 instructing Banks to implement the standard with effect from 1 January 2019. IFRS 9 sets out the requirements for recognizing and measuring financial assets, financial liabilities and some contracts to buy or sell non- financial assets, impairment of financial assets and hedge accounting. This standard replaces IAS 39 Financial Instruments: Recognition and Measurement.

a. Classification and measurement

The adoption of this standard will have an effect on the classification and measurement of Group's financial assets but is not expected to have a significant impact on the classification and measurement of financial liabilities. The classification and measurement of financial assets will depend on how these are managed (the entity's business model) and their contractual cash flow characteristics. These factors determine whether the financial assets are measured at amortized cost, fair value through other comprehensive income or fair value through statement of income. The standard eliminates the existing IAS 39 categories of held to maturity, loans and receivables and available for sale.

b. Impairment of financial assets

The impairment requirements apply to financial assets measured at amortized cost, fair value through other comprehensive income, and lease receivables and certain loan commitments and financial guarantee contracts. At initial recognition, allowance is required for expected credit losses ('ECL') resulting from default events that are possible within the next 12 months ('12-month ECL'). In the event of a significant increase in credit risk, allowance is required for ECL resulting from all possible default events over the expected life of the financial instrument ('lifetime ECL').

Financial assets where 12-month ECL is recognized are considered to be 'stage 1', financial assets which are considered to have experienced a significant increase in credit risk are in 'stage 2', and financial assets for which there is objective evidence of impairment so are considered to be in default or otherwise credit impaired are in 'stage 3'.

The assessment of whether credit risk has increased significantly since initial recognition is performed for each reporting period by considering the change in the risk of default occurring over the remaining life of the financial instrument, rather than by considering an increase in ECL.

The assessment of credit risk and the estimation of ECL are required to be unbiased and probability-weighted, and should incorporate all available information which is relevant to the assessment including information about past events, current conditions and reasonable and supportable forecasts of economic conditions at the reporting date. In addition, the estimation of ECL should take into account the time value of money. As a result, the recognition and measurement of impairment is intended to be more forward-looking than under IAS 39 and the resulting impairment charge will tend to be more volatile.

The Bank is in the process of quantifying the impact of this standard on the Bank's consolidated financial statements, when adopted. CBE in its circular of 28 January 2018 has mandated all Banks to account for a reserve equal to 1% of the credit Risk Weighted Assets ("RWA") as of 31 December 2017, The reserve amounted EGP 190,094,628 CBE has also advised that this reserve should be included in Tier 1 Capital and should be appropriated only with CBE's approval.
